

NABARD's Footprints: Empowering Telangana's Aspirational Districts

Vision Mission

Foreword

It gives me great pleasure to reflect on NABARD's transformative role in Telangana's journey towards sustainable growth and rural empowerment. Over the past decade, NABARD has been at the forefront of driving rural development, improving agricultural productivity, and uplifting communities across the state.

The aspirational districts of Bhadradri Kothagudem, Jayashankar Bhupalpally, and Kumuram Bheem Asifabad stand as prime examples of our efforts to bridge development gaps. These districts, home to remote tribal populations, have benefited from NABARD's infrastructure projects, financial inclusion programs, and capacity-building initiatives.

In Bhadradri Kothagudem, NABARD has focused on improving irrigation, rural roads, and supporting Farmer Producer Organizations (FPOs). In Jayashankar Bhupalpally, our work in financial inclusion, SHGs, and entrepreneurship has empowered tribal communities. Kumuram Bheem Asifabad has seen success in skill development and creating alternative livelihoods, such as handicrafts and food processing.

As we look to the future, NABARD remains committed to these districts, working towards inclusive development and sustainable growth. The stories in this book are a testament to the power of collaboration and the positive change that can be achieved through dedicated efforts. With continued focus, we are confident that these districts will continue to thrive as key contributors to Telangana's overall development.

1

Kumuram Bheem Asifabad

Kumuram Bheem Asifabad District, carved from the erstwhile Adilabad District, is bordered by Adilabad, Mancherial, and Nirmal districts, along with Maharashtra. Comprising 15 mandals and two revenue divisions, Asifabad and Kaghaznagar, the district is home to a predominantly tribal population, with its headquarters in Asifabad. The district is known for its rich industrial landscape, with key players like Singareni Collieries, Sirpur Paper Mills, and various spinning and ginning mills. Historically significant, it is home to archaeological sites such as the Gangapur Cave and fossils from the pre-historic era, with tourist attractions like the Kumuram Bheem project and Movvad village adding to its appeal.

District at a Glance..

- ❖ 4878.00 sq.km Geographical Area
- ❖ 2 Sub Divisions
- ❖ 15 Blocks
- ❖ 434 revenue villages
- ❖ 335 Gram Panchayats
- ❖ Population-515800

- ❖ Northern Telangana Agro Climatic Zone
- ❖ Climate- Tropical
- ❖ Soil Type- Black Cotton soil Red soil and sandy soil
- ❖ Net Irrigated Area -12000 Ha
- ❖ Gross Irrigated Area-35000 Ha

FY 2020-2026

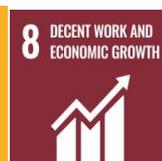

Special Refinance Scheme for Aspirational Districts

- Special Refinance Scheme to boost economic activities and employment in aspirational and low PSL districts

- Corpus- ₹1000 crore for 2024-26.
- ₹500 crore will be allocated annually, providing Rs. 2 crore per district for 112 aspirational and 196 low PSL districts

- Interest rate at 100 bps lower than the prevailing refinance rate.
- Refinance will cover 95% of the loan outstanding for eligible loans with a residual maturity of over 18 months in the StCB books.

Special Refinance Scheme for transforming PACS as MSC

NABARD's Special Refinance Scheme supports PACS transformation into Multi-Service Centres, boosting rural infrastructure in Telangana. It has aided 286 PACS with 514 projects, including storage, agri-outlets, processing, transport, and custom hiring. With ₹210.34 crore sanctioned, ₹167.98 crore disbursed, and 2.93 lakh MT storage added, the initiative enhances farm mechanization and rural development.

2 PACS supported in Kumaram Bheem Asifabad with refinance amount of ₹84.02 lakh for construction of Godowns, Farmers Agri Outlets, Weigh bridge

Maa Thota-Integrated Tribal Development Programme....Empowering Tribals

Integrated Tribal Development Programme by NABARD focuses on the socio-economic development of tribal communities through support in agriculture, infrastructure, income generation, and education, ensuring sustainable growth.

- ❖ Total No. of projects-2
- ❖ Project Cost- ₹511.64 lakh
- ❖ Impact-956 beneficiaries

Success Story: Maa Thota Project

Sustainable Livelihood Development

Problem

- Limited income after the rainy season forced families to migrate for work

Solution

- NABARD provided financial assistance for Sustainable Livelihood opportunities such as Tent House (15*15mtr) Flour and Masala Mills Ladies Emporium Multi-Purpose Rice Mill Cloth Centre Vegetable Sellers Kirana Shops Home Paintings etc

Impact

- project created sustainable livelihood assets for 415 tribal families, offering long-term income and improved economic well-being.
- ₹36.16 lakhs in beneficiary contributions, reflecting strong commitment and ownership, ensuring sustainability.
- At the start of the project, 69 families were migrating for work, but after its implementation, they no longer need to migrate for their livelihood.
- The project improved livelihood opportunities and quality of life, allowing families to stay in their communities without migrating.

Producer Organizations: Harnessing the Power of Collectivization.....

NABARD has been promoting and handholding community driven institutions both in Farm sector (Farmer Producer Organizations (FPOs) and Off-farm sector (Off Farm Producer Organizations) enabling them to leverage the economies of scale and get better bargaining power

- ❖ Total No. of FPOs- 7
- ❖ Membership- 3335
- ❖ Paid up Capital- ₹54.33 lakh
- ❖ NABARD Grant Support for FPO promotion & formation- ₹81.14 lakh
- ❖ Business Development Assistance- ₹ 15 lakh
- ❖ Business Activity- Input Business
- ❖ Revenue from operations- ₹ 526 lakh
- ❖ Convergence with TRICOR
- ❖ All FPOs have registered on ONDC

Success Story -BBWS FPCL, Kumaram Bheem Asifabad District.....

- FPO started with 150 farmers, now has 555 farmers
- Share capital of the FPO has progressively increased over the years with existing members contributing additional share capital
- The FPO is procuring and marketing Cotton, Redgram and paddy
- The FPO is selling quality inputs to the farmers and providing custom hiring services

<p>Name of FPO BBWS FPCL</p>	<p>Year of Incorporation 2017</p>
<p>Membership 555</p>	<p>Share Capital ₹15.79 Lakh</p>
<p>Business Activities: Input business, Custom Hiring, Cotton Marketing, Sorting, Grading of pulses</p>	<p>Turnover (2021-22) ₹149 lakh</p>
<p>Credit linkage :₹80 Lakh- NABKISAN, ₹18 Lakh- SBI & ₹ 25 Lakh- Samunnati</p>	<p>Market tie-ups</p>
<p>Retailer, Local Mandi, eNAM</p>	

Contd..

Background before FPO formation

Farmers faced challenges with low-quality seeds, spurious inputs, labor shortages, and unremunerative prices from private ginners

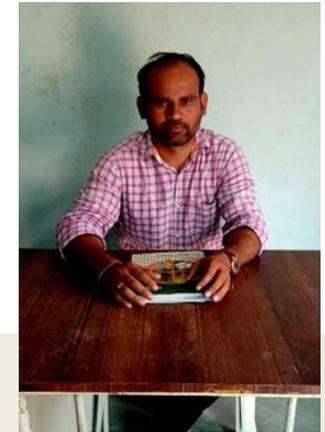

Activities:

Input service centre, Custom Hiring Centre and Procurement and aggregation of Cotton, Pulses and Paddy

Impact:

Farmers now receive quality seeds and fertilizers, saving ₹2000 on inputs, while FPOs provide farm equipment, easing labor shortages.

The produce is being procured and aggregated for better market options and remunerative prices. Farmers earn ₹300 more per sale through FPOs, which ensure better market access. The FPO has recorded a ₹1.38 lakh profit.

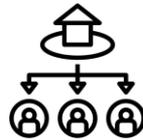

Tirupati, CEO, BBWS FPCL
“I am the CEO of BBWS Farmer Producer Company Limited. The FPO has helped in reducing the dependence of farmers on informal sources for provision of quality inputs and farm implements on time. Farmers are able to fetch remunerative prices for cotton, millet and paddy crops. The farmers’ income has increased by approximately ₹20,000. The FPO is earning around ₹4.00 lakh per annum from the CHC. In the future, we intend to establish a cotton ginning mill and rice mill.”

Connecting Producer Organisations and Markets.....

Marketing Support to BBWS Farmer Producer Company Ltd., Kumram Bheem Asifabad district for Mobile Van

Mobile Van for Marketing intervention Sanctioned on August 2023

More than **550** farmers benefitted

Increase in income of FPO by ₹ **1.00** lakh /year

Skilling and Enterprise Development..

Building Capacities for Sustainable Success

NABARD has been promoting skill building and entrepreneurship through demand and outcome based skilling programmes leading to wage / self employment in rural India. It has also strengthened micro-enterprises in the off-farm sector to enhance opportunities in terms of income and employment for rural youth and SHG women.

Micro Enterprise Development Programme

To address the skill gap and production inefficiencies among SHG members for sustainable livelihood

1. Total Projects: 7
2. Total No. of beneficiaries :210

Livelihood and Enterprise Development Programme

For promotion of enterprises by SHG women in contiguous clusters

1. Total Projects: 3
2. Total No. of beneficiaries :300

Mobile ATMs - Taking Banking to the Customers

Problem

In Komaram Bhim Asifabad District, a significant problem existed due to the low percentage of households availing banking services, as many interior villages lack access to essential financial services such as remittance and withdrawal facilities.

Solution

Through the van, the bank expanded services to previously uncovered areas, effectively encouraging the tribal and backward populations to use banking services. NABARD's sample study found the vans cover 12 villages per month, serving 29 customers

Impact

NABARD funded two Mobile vans for ₹30 lakhs under FIF to cover interior villages in Asifabad. One was provided through Adilabad DCCB and other through TGB.

Equipped with mini and micro-ATMs and financial literacy materials, these vans promoted digital transactions in rural areas.

First Listing under Social Stock Exchange for Tribal Development Project in Telangana: Babjipet Sustainable Livelihood Development Project

First Listing under Social Stock Exchange for Tribal Development Project in Telangana

Insights & Experiences from NABARD's District Development Manager – Kumuram Bheem Asifabad District

As NABARD's District Development Manager (DDM), my experience in handling the Aspirational District (Kumuram Bheem Asifabad district) has been deeply focused on driving sustainable development and financial inclusion. I have actively facilitated TDF projects in Tiryani and Sirpur (U) blocks, enhancing agricultural practices and livelihoods. Through Watershed and Climate Proofing initiatives, I have worked towards improving water conservation and soil productivity. Additionally, I have overseen infrastructure projects under RIDF, including Mission Bhagiratha, to ensure better access to potable water. Promoting four FPOs, I have supported tribal communities and SHG women with training, value addition, and market linkages. My collaborative efforts with government agencies, financial institutions, and community organizations have contributed to the district's overall socio-economic growth. As we continue to build on these initiatives, my commitment remains steadfast in ensuring long-term development, self-reliance, and prosperity for the district's communities.

Bhadradi Kothagudem

Formed from erstwhile Khammam, Bhadradi Kothagudem shares borders with Bhoopalapalle, Mahabubabad, Khammam, Andhra Pradesh, and Chhattisgarh. With 23 mandals and two revenue divisions (Kothagudem & Bhadrachalam), its headquarters is in Kothagudem. The district is home to Bhadrachalam, a major pilgrimage town on the Godavari River, renowned for its Sri Rama Temple with self-manifested idols. It houses key industries like Singareni Collieries (SCCL), Kothagudem Thermal Power Station (TSGENCO), and ITC-PSPD. With the largest forest cover in Telangana, it produces teak, bamboo, eucalyptus, and medicinal plants. Educational institutions include KUCE, Telangana's first mining college, and Government Polytechnic Kothagudem. Major attractions include Kinnerasani Dam & Wildlife Sanctuary, a scenic biodiversity hotspot, and Parnashala, a mythological site linked to the Ramayana.

District at a Glance..

- ❖ 7483.00 sq.km Geographical Area

Success Story -under PACS AS MSC

Satyanarayanapuram PACS

PACS Satyanarayanapuram, established on 26th June 1974 in Cherla mandal, Badradri Kothagudem district, serves 32 villages and 12 gram panchayats. It provides financial and non-financial services, including fertilizer sales, paddy procurement, and seeds/pesticides. The society has 1,680 members, with 1,160 borrowing members. It has partnerships with MARKFED, IFFCO, and KRIBHCO. A godown for fertilizer and seed delivery was set up in 2016. The society's president is Sri. Mandapati Achtyutha Srinivasa Raju, and the CEO is Sri. Doddi Ramachandra Prabhu

PACS Satyanarayanapuram, guided by DCCB and BDO officers, has diversified its services to include 2-wheeler loans, small business loans, gold loans, and personal loans. The society received an MSC loan of Rs. 26.55 Lakhs from NABARD to meet the increasing demand for credit. Despite competition from rice millers, it procured 86,000 quintals of paddy last year, earning a commission of Rs. 26.87 Lakhs.

The society owns assets like office buildings, godowns, and a petrol bunk. The petrol bunk, which reopened as a retail outlet in February 2024, has a net profit of Rs. 22,07,271.82 after expenses. With proactive leadership, committed staff, and support from DCCB and NABARD, PACS Satyanarayanapuram has become a strong competitor to local banks and a trusted service provider to its members.

Climate proofing project

Success Story: Climate Proofing Project- Sub Surface Dyke (SSD)

Climate Proofing Project

Village: Jaggaram Kommugudem Amredha Korsavarigudem

Problem

- Lack of infrastructure for pandal creation
- Lack of awareness about vegetable cultivation
- Poor water use efficiency in the field.
- Lack of soil and water conservation

Solution

- Grant assistance of ₹50.00 lakh for climate proofing interventions.
- Pandal for vegetable cultivation
- Drip and sprinkler irrigation for water use efficiency
- Soil and moisture conservation works
- Green manure cultivation

osure

Impact

- Promotion of vegetable cultivation and crop diversification
- Per acre income of farmers increased to ₹50000 due to vegetable cultivation
- Soil and moisture conservation works increased ground water table and provided critical irrigation
- Activities like mulching deep ploughing and green manure improved soil fertility and agricultural yield

JIVA Natural farming

An agro-ecological transformational approach leveraging the pre-existing social and natural capital in watershed and wadi projects while adopting “natural farming” as its key approach.

What We are Trying to ACHIEVE under JIVA

Mallaigudem Watershed – JIVA
WASSAN PFA

BIO-INPUT RESOURCE CENTRE : Growing Dreams, Harvesting

- Intensive Usage of fertilizers and pesticides
- High Input cost and declining returns for farmers
- Degrading soil quality and fertility

- Bio Resource Center (BRC) established in enterprise mode
- One-Stop-Shop for locally made bio-concoctions at affordable rates

Mallaigudem Watershed – JIVA

- Making available Jeevamrutham – 10,000 liter per month
- Preventing over-fertilization and enhanced soil fertility
- Resulting in lesser input costs for farmers
- Turnover of ₹ 1.05 lakh from BRC. Will increase substantially after upgradation.

Mallaigudem Watershed – JIVA
WASSAN PFA

Harvesting Healthy Future for Futures of NATION - Fodder crops played the trick

Problem

- Insufficient availability of green fodder in the local area
- Low milk yields and reduced fat content

Solution

- Established interconnectedness between soil, crops, animals and humans.
- Siva Kanth and Manisha, a young couple, are cultivating Super Napier variety which allows for the first cutting after 60 days and subsequent cuttings every 30 to 35 days.

Mallaigudem Watershed – JIVA

Impact

- Round the year availability of fodder
- 02 Liters of milk yield increased for 03 buffaloes resulting in increase in monthly income by ₹3000/-
- Additional income from sale of fodder slips
- Ensured Nutritional Security for family

Maa Thota-Integrated Tribal Development Programme....Empowering Tribals

Integrated Tribal Development Programme by NABARD focuses on the socio-economic development of tribal communities through support in agriculture, infrastructure, income generation, and education, ensuring sustainable growth.

- ❖ Total No. of projects-2
- ❖ Project Cost- ₹548.45 lakh
- ❖ Impact- 1000 Beneficiaries

Success Story : Natures Keepers: Sustainable Development in Tribal Lands

Problem

- Low income from cotton of around ₹25000 per acre
- Low level of awareness about orchard based plantation crops

Solution

- Cashew orchards of 1 acre each to 450 families
- 50 livelihood enterprise units to landless families
- Capacity building about plantation crops
- Community based institutions to develop social capital
- Total project grant assistance of ₹ 3.25 cr. for 6 years

Village:Kampagudem Moguralaguppa

Impact

- Landless families are earning an income of ₹10000 to ₹12000 per month
- Crop diversification from cotton to cashew nut by 450 farmers
- Development of water resources for critical irrigation needs of the community

Producer Organizations: Harnessing the Power of Collectivization.....

3

Jayashankar Bhupalapally

Jayashankar Bhupalpally district in Telangana is known for its agriculture, with crops like paddy, chilli, cotton, and turmeric. Irrigation is mainly provided by the Devadula Lift Irrigation and ancient tanks built by the Kakatiya rulers. Key industries include Singareni Collieries and Kakatiya Thermal Power Plant. The district is also rich in cultural and historical sites, such as the Kaleshwaram Temple, the Mukteshwara Swamy Temple, Nainpaka Temple, and Kota Gullu Ganapeshwara Swamy Temple. Additionally, prehistoric rock art and cave paintings can be found at Pandavula Gutta. The Kaleshwaram Lift Irrigation Project (KLIP) is the world's largest multi-stage lift irrigation project. Major tourist attractions include the Kaleshwaram Temple, Pandavul Gutta, and various barrages like Medigadda and Annaram. The district is well-connected by road, with NH 353C passing through it.

For promotion of enterprises by SHG women in contiguous clusters

1. Total Projects: 2
2. Total No. of beneficiaries :180

Insights & Experiences from NABARD's District Development Manager – Jayashankar Bhupalapally District

As NABARD's District Development Manager (DDM) for Jayashankar Bhupalapally, our efforts have been dedicated to accelerating development in this Aspirational District, focusing on sustainable livelihoods, financial inclusion, and climate resilience while empowering communities through traditional and modern livelihood initiatives.

Reviving the traditional Tussar silk cluster in Mahadevpur, we have empowered artisans socially and economically. In Mahamutharam, a designated Aspirational Block, Tribal Development Fund (TDF) projects have strengthened tribals in good agricultural practices and diversified livelihoods. Our Watershed and Climate Proofing initiatives in Dhanwada, Deverampally, and Bayyaram have enhanced water conservation, soil productivity, and long-term agricultural sustainability.

Entrepreneurship development programs, particularly for women-led Self-Help Groups (SHGs), have boosted household incomes. Capacity-building efforts have equipped farmers with knowledge on oil palm cultivation, chilli pest management, and improved paddy varieties. Financial inclusion campaigns have expanded access to essential banking and credit services, driving economic empowerment across communities.

Under the Rural Infrastructure Development Fund (RIDF), we have facilitated critical infrastructure projects, improving schools, potable drinking water, irrigation, and agricultural facilities. Additionally, we have promoted two Farmer Producer Organizations (FPOs), ensuring better access to agro-inputs, value addition, procurement, and market linkages for tribal communities.

Through collaborative efforts with government agencies, financial institutions, and community organizations, we continue to drive inclusive growth and socio-economic transformation in the district. Our commitment remains unwavering in building a resilient, self-reliant, and prosperous future for Jayashankar Bhupalapally.
