

“Spring-shed development works for rejuvenation of springs for climate resilient development in the water stressed areas of Meghalaya”: The objective of the project is to revive impaired and critical springs to ensure enhanced water, food and livelihood security of vulnerable communities through scientific and participatory development of spring-sheds as a climate change adaptation strategy. Spring-shed development works would be undertaken in 306 vulnerable spring-sheds in all 11 districts of Meghalaya and would benefit 16,494 households. The project is being executed by Directorate of Soil and Water Conservation, Government of Meghalaya with an outlay of Rs. 22.91 Crores.
