

“Integrated surface Water Management through Rejuvenation of 20 tanks and 32 village ponds for Climate Change Adaptation in Puducherry”: The project aims to rejuvenate surface water resources such as tanks & ponds to increase its storage capacity, increase ground water recharge, limiting ground water salinization and minimize the risk of usage of saline water. The project would cover rejuvenation of 20 tanks and renovation of 32 village ponds benefitting 8.5 lakh residents of Puducherry. Department of Science and Technology, Government of Puducherry is executing the project with an outlay of Rs. 16.76 Crores.
