| 1    | Bidder’s Minimum Eligibility Criteria Check list[Page :69]  
RFQ: The OEM should possess ISO 27018 certification. ISO/IEC 27018:2014 is a code of practice that focuses on protection of personal data in the cloud. It is based on ISO/IEC information security standard 27002 and provides implementation guidance on ISO/IEC 27002 controls applicable to public cloud Personally Identifiable Information (PII).  
**Corrigendum 1:** ISO 27018 would be exempted and ISO 27001 is required.  
The requirement of ISO 27018/ 27001 has been removed from the eligibility criteria. However, Bidders who have the certification may provide the same. Bidders without the certification are required to provide a certificate of assurance of the platform for any vulnerabilities assessed by any reputed method, to ensure security posture of the platform is not compromised. |
