

संभाव्यतायुक्त ऋण योजना Potential Linked Credit Plan 2025 26

जम्मू और कश्मीर क्षेत्रीय कार्यालय, जम्मू Jammu & Kashmir Regional Office, Jammu

दृष्टि

ग्रामीण समृद्धि के लिए राष्ट्रीय विकास बैंक

ध्येय

सहभागिता, संधारणीयता और समानता पर आधारित वित्तीय और गैर- वित्तीय सहयोगों, नवोन्मेषों, प्रौद्योगिकी और संस्थागत विकास के माध्यम से समृद्धि लाने के लिए कृषि और ग्रामीण विकास का संवर्धन

Vision

Development Bank of the Nation for Fostering Rural Prosperity

Mission

Promote sustainable and equitable agriculture and rural development through participative financial and non-financial interventions, innovations, technology and institutional development for securing prosperity

Potential Linked Credit Plan

Year: 2025-26

District: Rajouri

UT: Jammu and Kashmir

National Bank for Agriculture and Rural Development Jammu and Kashmir Regional Office, Jammu

प्राक्कथन

जम्मू और कश्मीर प्रभाव परक समग्र और सतत विकास की दिशा में आगे बढ़ रहा है। आजीविका पैटर्न, कृषि-जलवायु प्रणालियों, आधारभूत संरचना विस्तार और सामाजिक-आर्थिक सहयोगों में क्षितिज में ऊपर की ओर परिवर्तन हो रहे हैं। निजी संस्थान भी एक वाणिज्यिक उद्यम के रूप में कृषि में प्रवेश कर रहे हैं। कृषि के अलावा, हस्तशिल्प और पर्यटन केंद्र शासित प्रदेश की ग्रामीण जनसांख्यिकी के लिए आजीविका का प्राथमिक स्रोत बने हुए हैं। जीवन की गुणवत्ता को बढ़ाने हेतु और आजीविका को सतत जलवायु स्थिति में लाने में पूंजी निर्माण के लिए कृषि और ग्रामीण विकास गतिविधियों में शामिल ऊपर से नीचे तक सभी हितधारकों के सहयोग और समन्वय की आवश्यकता होती है।

नाबार्ड ने सरकार, भारतीय रिज़र्व बैंक (आरबीआई), वित्तीय संस्थानों, भागीदार एजेंसियों और अन्य हितधारकों के मार्गदर्शन और सहयोग के साथ ग्रामीण भारत की ऋण आवश्यकताओं, संस्थागत विकास और जलवायु संधारणीयता में आधार स्तर के सहयोगों हेतु ग्रामीण लोगों की आवश्यकताओं को पूरा करने के लिए पारिस्थितिकी तंत्र का व्यवस्थित रूप से विस्तार किया है। अपनी मुख्य जिम्मेदारी के रूप में नाबार्ड 1989 से प्रत्येक जिले के लिए सभाव्यतायुक्त ऋण योजना (पीएलपी) तैयार कर रहा है।

वित्तीय वर्ष 2025-26 के लिए नाबार्ड ने कृषि, एमएसएमई क्षेत्र और ग्रामीण विकास से संबंधित विभिन्न हितधारकों के साथ विस्तृत परामर्श के बाद जम्मू और कश्मीर के जिलों के लिए पीएलपी अभ्यास शुरू किया है। संबंधित जिलों में उपलब्ध संसाधनों और आधारभूत संरचना को ध्यान में रखते हुए,वित्तीय वर्ष 2025-26 के लिए ऋण संभाव्यता का अनुमान प्राथमिकता वाले क्षेत्रों के तहत विभिन्न गतिविधियों के लिए लगाया गया है।

पीएलपी जिले में विभिन्न क्षेत्रों के लिए ऋण संभाव्यता का विस्तृत वैज्ञानिक आकलन प्रदान करता है। इसमें क्षेत्र विशिष्ट आधारभूत संरचना अंतरालों और प्राथमिकता प्राप्त क्षेत्र के अंतर्गत उपलब्ध क्षमता का दोहन करने के लिए राज्य सरकारों और वित्तीय संस्थाओं द्वारा किए जाने वाले महत्वपूर्ण सहयोगों पर प्रकाश डाला गया है।

इस वर्ष, नाबार्ड ने कुशल ऋण अनुमानों हेतु डिजिटल पीएलपी तैयार करने के लिए प्रौद्योगिकी का लाभ उठाया है। नई पीढ़ी के इस दस्तावेज में संरचना, कवरेज और डेटा सूचकांकों का मानकीकरण किया गया है। इसने मैन्युअल हस्तक्षेपों को लगभग समाप्त कर दिया है, जो डेटा संचालित वातावरण का संस्थापक ब्लॉक है। हमारा मानना है कि यह डिजिटल पीएलपी ग्रामीण भारत को सशक्त बनाने और ग्रामीण इको-सिस्टम में सभी हितधारकों की जरूरतों को पूरा करने के लिए उत्प्रेरक होगा।

मुझे इस पीएलपी पर भरोसा है जो जिला ऋण योजना को गति देने में एक सूचनात्मक और रेफरल दस्तावेज के रूप में खुद को साबित करेगा जिसका उपयोग जिले के ऋण , गैर ऋण और एकीकृत सामाजिक-आर्थिक विकास में प्रभाव परक वृद्धि के लक्ष्य को प्राप्त करने के लिए किया जा सकता है।

विभिन्न सरकारी विभागों और बैंकों के अधिकारियों द्वारा निभाई गई महत्वपूर्ण भूमिका को स्वीकार करते हुए, मैं कलेक्टर और जिला मजिस्ट्रेट, भारतीय रिजर्व बैंक के अग्रणी जिला अधिकारी और अग्रणी जिला प्रबंधक को परामर्श प्रक्रिया में उनके अमूल्य निविष्टि, सहयोग और भागीदारी के लिए निष्कपट सराहना और हार्दिक आभार व्यक्त करता हूं। मैं ग्रामीण समृद्धि सुनिश्चित करने और ग्रामीण भारत को आगे ले जाने के लिए विभिन्न पहलों और सहयोगों के प्रभावी कार्यान्वयन और अनुप्रवर्तन के लिए उनके निरंतर सहयोग और मार्गदर्शन की भी आशा करता हूं।

(भल्लामुड़ी श्रीधर)

मुख्य महाप्रबंधक

FOREWORD

Jammu and Kashmir is moving forward on its trajectory towards impact-making holistic and sustainable growth. Changes in the horizon are taking place upwardly in livelihood patterns, agro-climatic systems, infrastructural expansion and socio- economic interventions. Private institutions are also entering into agriculture as a commercial venture. Apart from agriculture, handicrafts and tourism continues to be the primary source of livelihood for its rural demography of the Union Territory. Capital formation for furtherance of quality of life, livelihood on a sustainable climatic condition requires cooperation and coordination of all the stake holders, from top to bottom, involved in agriculture and rural developmental activities.

NABARD has systematically expanded the ecosystem to meet the requirements of rural people for base level interventions in credit requirements, institutional growth and climatic sustainability of rural India with guidance and support from the Government, Reserve Bank of India (RBI), Financial Institutions, Partner Agencies and other Stakeholders. As its core responsibility NABARD has been preparing the Potential Linked Credit Plan (PLP) for each district since 1989.

For the financial year 2025-26 NABARD has taken up the PLP exercise for districts of Jammu and Kashmir after elaborate consultation with various stakeholders concerned with Agriculture, MSME sector and Rural Development. Keeping in view the resources and infrastructure available in respective districts estimate of the credit potential for the FY 2025-26 has been made for various activities under priority sectors.

The PLP provides a detailed scientific assessment of credit potential for various sectors in the district. It highlights the sector specific infrastructure gaps and critical interventions to be made by State Governments and FIs for harnessing potential available under priority sector.

This year, NABARD has leveraged technology for preparing a digital PLP for efficient credit projections. This new generation document has standardized structure, coverage and data indices. It has almost done away with manual interventions, which is the founding block of a data driven environment. We believe that this Digital PLP will be a catalyst for empowering Rural India and serve the needs of all stakeholders in the rural eco-system.

I have confidence in this PLP which will prove itself as an informative and referral document in giving pace to the District Credit Plan which can be used for achieving the goal for impact-making growth in credit, non-credit and integrated socio-economic development of the district.

While recognising the vital role played by the officials of different government departments and banks, I hereby place on record my sincere appreciation and heartfelt gratitude to the Collector and District Magistrate, Lead District Officer of RBI and the Lead District Manager for their invaluable inputs, support and participation in the consultative process. I also look forward to their continued cooperation and guidance for effective implementation and monitoring of various initiatives and interventions for securing rural prosperity and taking rural India forward.

(Bhallamudi Sridhar)

Chief General Manager

PLP Document Prepared by:

Chander
District Development Manager NABARD
Rajouri
PLP Document finalized by: Jammu and Kashmir Regional Office

'The document has been prepared on the basis of information collected from publicly available sources and discussions with various stakeholders. While preparing the projections, every effort has been taken to estimate credit potential realistically. NABARD shall not be responsible for any material or other losses occurring to any individual/ organization owing to use of data or contents of this document.'

Executive Summary

1. Introduction

The Potential Linked Credit Plan (PLP) is prepared by NABARD each year keeping in view the national priorities, policies of the Government of India and State Government, infrastructure and linkage support and physical potential available in various primary, secondary and tertiary sectors.

2. District characteristics

1	Location	Rajouri district is a hilly and border district in Jammu Division of the UT of J&K. It falls between 70° and 74°-4 east longitude and 31°-58 and 33°-35 north latitude. The district is spread over an area of 2630 sq. km. and comprises of 385 villages.
2	Type of soil	The soil in Rajouri district primarily consists of mountainous soil types due to its hilly terrain, with alluvial soils in some low-lying river valleys
3	Primary occupation	The primary occupation in Rajouri district is agriculture, with a majority of the population engaged in farming and allied activities.
4	Land holding structure	The average landholding in Rajouri district is relatively small, typically around 0.95 ha. This size reflects a predominantly small and marginal farmer community.

3. Sectoral trends in credit flow

1	Achievement of ACP in the previous year	As against the target of Rs.1385.70 Crore, the total achievement under ACP stands at Rs.1921.74 Crore, which is around 138%.
2	CD Ratio	The CD ratio of most of the banks has noticed a YoY growth, from an average of 52.70% to 56.70% from March 2023 to March 2024.
3	Investment credit in agriculture	The investment credit in agriculture and allied has not been very encouraging and there is a decreasing trend in total agriculture credit from the previous year.
4	Credit flow to MSMEs	The credit flow to MSME sector has been very aggressive as the achievement in the MSME sector is 161%. There are many UT sponsored schemes which are promoting the lending growth in the MSME sector.

4. Sector/Sub-sector wise PLP projections

1	Projection for the year	The projections for the year 2025-26 has been assessed at Rs.1328.60 Crore which is approximately 14 percent more than that of projections of 2024-25. This significant increase is due to the HADP launched by UT Govt. which is expected to infuse Rs.5000 Crore in Rural Sector in next 05 years.
2	Projection for agriculture and it components	The projections in agriculture and its components has been assessed at Rs.616.45 Crore wherein except for Crop Loan, the major share is for dairy sector which has more potential and the milk products are named as ODOP for the District.
3	Projection for MSMEs	The MSME sector has seen a significant boost in the District and is expected to rise. Therefore for the year 2025-26, the potential under MSME has been assessed at Rs.521.26 Crore.
4	Projection for other purposes	In case of other sectors, the projections under housing sector is Rs.105.66 Crore. Moreover, for other sectors under other priority sector, the projections have been assessed and tabulated in the summary.

5. Developmental Initiatives

- NABARD is implementing its flagship programs viz., Tribal Development Project and Watershed Development Project in the Planger and Kalakote block(s) of the district respectively. Both the programs are promoting the soil as well as water conservation in the District through various activities.
- Further, NABARD has sanctioned 124 no. of projects under ongoing tranches of RIDF in the district (as on 31.03.2024), for supporting Government in creation of critical infrastructure in the district, with aggregate sanctioned loan amount of Rs.456.44 crore.
- NABARD is promoting 04 FPOs in the district under CSS-10,000 and 01 FPO under PODF-ID. Both the FPOs are aimed towards improving the livelihood of farming community.

6. Thrust Areas

- Nurturing the FPOs sanctioned under CSS through credit linkage support and facilitating market linkages of these FPOs.
- Implementation of Full Implementation Phase of WDF Project which will promote climate resilient activities in the proposed area.
- Implementation of Technology Transfer Projects in collaboration with KVK.

- Skill development and Livelihood Promotion of SHG members and unemployed rural youth.
- Undertaking Climate Resilience activities in the district with special focus on aspirational blocks.
- Establishment of small and nano-enterprises and encouraging the youths to bring innovative ideas and develop business models for employment generation.
- Introduction of modern technology in the agriculture sector wherein the help of AI tools and IOT can be encouraged, which will save time and improve productivity.
- Improving the fodder and grassland resources for livestock management which is currently facing a lot of challenges with respect to fodder availability.
- Formulation of schemes with special focus on the Bakerwals and Gujjar community of the district who are yet to receive any recognition in the modern world.

7. Major Constraints and Suggested Action Points

- Lack of processing units for maize, milk, vegetables and horticultural produce, lack of
 information about various government schemes, non- availability of quality seeds,
 fertilizers etc.
- Moreover, poor branch network, low spread of BCs, lack of off-farm skills and facilities for rural industrial entrepreneurship etc. are the major constraints in effective flow of GLC in the district.
- Increasing land coverage under horticulture crops by bringing in barren and uncultivable land under plant coverage (mango, citrus etc.) through micro irrigation practices
- Bringing more and more small holders under high value horticulture production system including precision farming.
- Area Based schemes may be formulated with credit linkage in potential clusters with necessary backward and forward linkages and coordinated efforts from department and banks
- Create and promote investment in infrastructure to support the development of fisheries and diversification of fish varieties.
- Under manufacturing enterprises, focus on developing and financing processing units. CGTMSE scheme needs to be made use of for enhancing credit to smaller units.

8. Way Forward

• All agencies will have to make concerted efforts to implement their programmes effectively so as to give fillip to the development of the district.

- Banks are also required to play a pivotal role by way of hassle-free credit dispensation, which may yield real dividend to the farmers, women, entrepreneurs and rural poor of the district.
- Formulation of schemes with special focus on the Bakerwals and Gujjar community of the district who are yet to receive any recognition in the modern world.

Methodology of Preparation of Potential Linked Credit Plans

1. Introduction

Potential Linked Credit Plan is a comprehensive documentation of potentials in the district for rural economic activities, both in physical and financial terms. It is also an assessment of the gaps in infrastructure support which need to be filled in to fully exploit the realizable potentials.

2. Objectives

The objectives of PLP are:

- to enable various organizations involved in the process of rural development in directing their efforts in a planned manner, in accordance with the potentials available for exploitation,
- to enable optimum utilization of scarce financial resources (specifically bank credit) by channeling the same into sectors with growth potential, and
- to assess the gaps in infrastructure support which need to be taken care of for exploiting the potentials and prioritize resource requirement for the purpose.

3. Methodology

NABARD took the initiative, in 1988-89, of preparing PLPs for agriculture and rural development. The broad strategy followed by NABARD for the formulation of PLPs envisages estimation of long-term potential (in terms of physical units) in each sector of agriculture and rural development with reference to natural and human resource endowments and a phased annual programme for development, keeping in view the relative national and state priorities. NABARD has been endeavoring to introduce refinements in the methodology of preparing PLPs and improving its contents so that the PLPs could be used as a reference document for Annual Credit Plans of banks. NABARD has been reviewing the methodology in estimation of potential through consultative process over the years. It adopts a detailed methodology for assessing the physical potential in major sectors of investment conducive to development of agriculture and rural areas.

The methodology consists of assessment of sector-wise/subsector-wise estimation of potential in consultation with technical officers of the Line Departments concerned at the district level, identification of infrastructure facilities required to support the exploitation of the potential, identification of infrastructure facilities available at present as well as planned and working out the gap in infrastructure, examination of the trends in sector-wise credit flow, various schemes of State/Central Govt., and estimation of block-wise physical and financial credit potential.

The indicative unit costs suggested by the State Level Unit Cost Committee are made use of while arriving at the financial outlays.

The broad methodology of arriving at the potential for major sectors is given below.

4. Methodology of estimation of credit potential

Sr. No.	Sector	Methodology
1	Crop loans	- Collection of data on Gross Cropped Area for a period of 10 years and data on land holdings;
		- Distribution of Gross Cropped Area between Small Farmers/ Marginal Farmers and Other farmers based on the total land occupied by small and marginal farmers on one hand and other farmers on the other;
		- Assumption to cover 100% of Small/ Marginal Farmers and 20-50% of Other Farmers;
		- Study the cropping pattern;
		- Estimation of credit potential taking into account Scale of Finance and also the KCC guidelines in vogue; and
		- Block-wise allocation of potential taking into account credit absorption capacity in each block, cropping pattern, etc.
2	Water Resources	- MI potential is the area that can be brought under irrigation by ground and surface water;
		- Collection of data on irrigation potential, area already brought under irrigation and balance potential available under groundwater and surface water for the district;
		- While fairly clear estimates are available for ground water and its present and future utilization, surface water estimates for individual districts are difficult to get;
		- Estimation of potential attempted block-wise based on categorization of blocks, type of rock formation, suitability of MI structures, projects planned by State Govt. etc.;
		- Preference of farmers for different MI structures like dug wells, bore wells, DCBW, etc. is taken into account; and
		- The potential for MI sector is defined in terms of numbers for DW, BW and TW, and in terms of area for lift irrigation, sprinkler and drip systems.
3	Farm Mechanization	- The potential estimate for farm mechanization takes into account irrigated and unirrigated cropped area in the district, economic life of tractors, optimum use of tractors, per acre use of tractors, replacement of tractors per year, assessment of availability of drought animal power/power tiller by using conversion factors;
		- Calculation of requirement of number of tractors assuming one tractor per 30 acres and 45 acres of irrigated and unirrigated cropped area respectively;

1			
		- Adjustment of tractor potential with land holdings; and	
		- Based on the cropping pattern, topography etc. similar	
		assessment is made for power tillers, combine Harvesters etc.	
4	Plantation and Horticulture	- Estimation of additional area that could be brought under plantation crops based on trend analysis of land utilization pattern and cropping pattern of the district, area of cultivable waste land likely to be treated and brought under plantation crops;	
		- Feasibility and possibility of shifting from food crops to plantation crops;	
		- Estimation of replanting by taking into account approximate economic life of a few plantation crops; and	
		- Estimation of potential for rejuvenation of existing plantations.	
5	Animal Husbandry	- Collection of data on number of milch animals as per the latest census;	
	and Dairy	- Estimation of milch animals for the reference year by assuming 30% calving, 50:50 sex ratio, 40% calf mortality and 50% culling for buffaloes; 40% calving, 50:50 sex ratio, 20% calf mortality and 50% culling for CBCs; and 30% calving, 50:50 sex ratio, 20% calf mortality and 50% culling for Indigenous cows; and	
		- 1/6th of the animals are assumed to be good quality animals and 60% of the good quality animals in milk and 60% of animals in milk are on 2nd and 3rd lactation. 50% of the number of animals so arrived are assumed to be animals available for bank finance.	

5. Agency-wise Use Utility

Continuous efforts are made to make PLPs user-friendly keeping in view the stakeholders' focus. The document is useful to various stakeholders in a variety of ways, as illustrated below:

1 H	- Provides inputs/ information on Exploitable potential vis-a-vis credit possible;
	- Potential High Value Projects/ Area Based schemes; and
	 Infrastructure support available which can form basis for business/ development plans. Other support required to increase credit flow; and Identification of sectors for Government sponsored programmes.

2	Government Agencies/ Departments	- Infrastructure required to support credit flow for tapping the exploitable potential;
3	Individual/ Business entities	 - Private investment opportunities available in each sector; - Availability of commercial infrastructure; and - Information on various schemes of Govt. & Banks.

6. Limitations and constraints

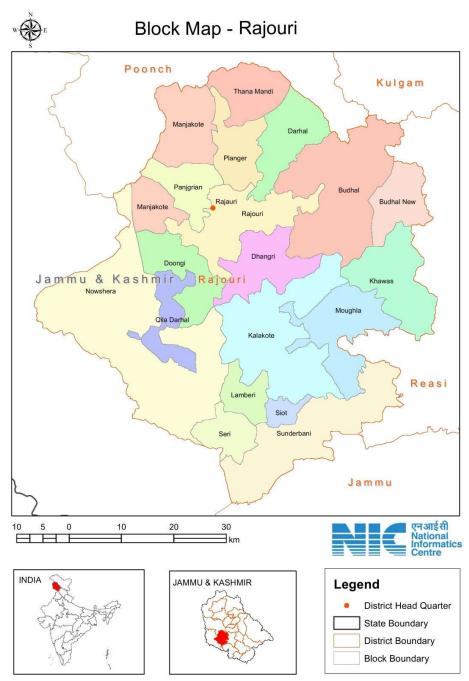

Though concerted efforts are made to estimate the potentials realistically, non-availability of accurate granular data on credit flow – Sector and sub-sector-wise are noticed in the exercise of PLP preparation.

Chapter 1

1. Important Policies and Developments

Policy Initiatives – GoI (including Cooperatives)

i. Cooperative Development

The Ministry of Cooperation GoI has taken 54 initiatives to strengthen and deepen the cooperative movement at the grassroots level. The ministry in coordination with state governments NABARD national level federations and other stakeholders is working on the following initiatives:

ii. World's Largest Grain Storage Plan in Cooperative Sector (WLGSP)

Ministry of Cooperation (MoC) GoI is implementing Pilot Project for World's Largest Grain Storage Plan in Cooperative Sector. The Pilot Project entails setting up of grain storage infrastructure including warehouse and silos along with other agri-infrastructure including Procurement Centre Custom Hiring Center Primary Processing Center Grameen Haats etc.

iii. Centrally Sponsored Scheme for Computerization of Primary Agricultural Credit Societies (PACS)

Government has approved a scheme for Computerization of Primary Agricultural Credit Societies (PACS) with the objective of increasing efficiency of PACS bringing transparency and accountability in their operations; facilitating PACS to diversify their business and undertake multiple activities/ services. A total of 63000 PACS have been taken for computerization under the project.

- iv. Establishing Multi-purpose PACS/ Dairy/ Fisheries cooperatives in every panchayat with support of NABARD NDDB NFDB NCDC and other National Level Federations
- v. PACS as Common Service Centers (CSCs) for better access to e-services
- vi. Ministry of Cooperation has announced supporting more than 300 e-services through PACS in association with MeitY NABARD and CSC e-Governance Services India Limited.
- vii. Micro-ATMs to Bank Mitra Cooperative Societies for providing doorstep financial services

viii. Computerization of Agriculture and Rural Development Banks (ARDBs)

To strengthen the long-term cooperative credit structure, the project of computerization of 1851 units of Agriculture and Rural Development Banks (ARDBs) spread across 13 States/ Union Territories has been approved by the Government. NABARD is the implementing agency for the project and will develop a national level software for ARDBs.

ix. Co-operative Education – Setting up of World's Largest Cooperative University

This aims at introduction of cooperative education in independent degree / diploma courses in Schools and Universities.

x. World's Largest Cooperative Training Scheme

This aims at revamping existing cooperative training structure in the country.

- **xi.** New Cooperative Policy with a view to strengthen the cooperatives and make them vibrant with increased contribution to the economy
- **xii.** Amendment to Multi State Cooperative Act 2002 and setting up of 3 new Multi State Cooperative Society (MSCS) in the areas of seed production and marketing; organic products and export from cooperative sector.
- **xiii.** To provide facilities at par with FPOs for existing PACS and Establishment of National Cooperative Database

xiv. Digital Agriculture Mission

The Digital Agriculture Mission (DAM) aims to revolutionize India's agriculture sector by leveraging digital technology inspired by the success of India's digital revolution in other sectors. With a substantial financial outlay of 2817 crore it focuses on creating a Digital Public Infrastructure (DPI) for agriculture.

xv. Agri. Stack:

Key components of the mission include the Agri Stack—a farmer-centric DPI to streamline services with the creation of a unique digital Farmer ID linked to important farmer data such as land records and crop details.

xvi. Vistaar (Virtually Integrated System to Access Agricultural Resources):

Vistaar initiative of MoA&FW is an open interoperable and federated network dedicated to agricultural information and advisory services with a mission to empower farmers and enhance their farming practices for better sustainable livelihood.

xvii. JanSamarth Portal:

JanSamarth Portal a GoI initiative is a unique digital portal linking credit linked schemes for ease of access to the all the beneficiaries and related stakeholders. Schemes such as e-Kisan Upaj Nidhi KCC AIF etc. are accessible through the portal.

xviii. Agriculture Infrastructure Fund (AIF) Scheme

The Agricultural Infrastructure Fund (AIF) has played a pivotal role in transforming India's agricultural landscape. In addition to existing activities the purview of AIF scheme has now been extended to the following:

- **xix.** Viable Farming Assets: The scheme now includes the creation of infrastructure for viable projects for building community farming assets.
- **xx.** Integrated Processing Projects: The list of eligible activities under AIF now includes integrated primary and secondary processing projects.
- **xxi.** PM KUSUM Component: The aim is to promote sustainable clean energy solutions alongside agricultural infrastructure development.

- **xxii.** Enhanced Credit Guarantee Coverage: The government proposes to extend AIF credit guarantee coverage for FPOs through the NABSanrakshan Trustee Company Pvt. Ltd.
- **xxiii.** Government has approved merger of Dairy Processing & Infrastructure Development Fund (DIDF) with Animal Husbandry Infrastructure Development Fund (AHIDF) and extension of AHIDF for another three years till 31 March 2026. Further NABARD is included as loaning entity under the revamped AHIDF scheme.

xxiv. Fisheries & Aquaculture Infrastructure Development Fund (FIDF)

GoI has extended the scheme for a period of another 3 years from 01.04.2023 to 31.03.2026.

xxv. Framework for Voluntary Carbon Market (VCM) in Agriculture Sector:

The Ministry of Agriculture and Farmers Welfare GoI has launched a Framework for Voluntary Carbon Market in Agriculture Sector. Under the Framework the Ministry envisages creating long-term carbon credit benefits primarily for small and marginal farmers by developing a VCM Framework and setting guidelines. NABARD is the nodal agency to coordinate and implement the various pilot projects under the VCM.

xxvi. PM JANMAN (Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan):

PM JANMAN is a recently launched initiative by the Government of Indiaspecifically designed to address the socio-economic challenges faced by the Particularly Vulnerable Tribal Groups (PVTGs) across the country. The program aims for the comprehensive development of 75 PVTGs in 18 states and 1 Union Territory with an allocation of Rs.24104 crore.

2. Union Budget

2.1 Important Announcements

- Digital Public Infrastructure for Agriculture: Issuance of Jan Samarth based Kisan Credit Cards.
- Release of new varieties: 109 varieties of 32 high-yielding and climate -friendly crops will be released for cultivation by farmers.
- Natural Farming: To increase productivity as well as reduce input costs one crore farmers
 will be linked to natural farming in the next two years. Further 10000 need-based bioinput resource centres will be established.
- Vegetable production & supply chain: To bolster vegetable supply chains the budget proposes the creation of large-scale production clusters near major consumption centres by promoting Farmer-Producer Organizations (FPOs) cooperatives and start-ups for vegetable supply chains including for collection storage and marketing.
- Budget focusses on development of Digital Public Infrastructure (DPI) a digital crop survey for Kharif crops will be conducted in 400 districts
- A network of nucleus breeding centres for shrimp broodstocks will be established with funding for shrimp farming and exports facilitated through NABARD.
- Pradhan Mantri Janjati Unnat Gram Abhiyan will be launched to improve the socioeconomic condition of tribal communities.

- Mudra Loans: The limit enhanced to Rs.20 lakh from the current 10 lakh under the Tarun category.
- Credit Guarantee Scheme for MSMEs in the Manufacturing Sector will be introduced for facilitating term loans for purchase of machinery and equipment without collateral or third-party guarantee.
- Development of Twelve industrial parks under the National Industrial Corridor Development Programme.
- Phase IV of PMGSY will be launched to provide all weather connectivity to 25000 rural habitations.
- Assistance for flood management and related projects in Assam Bihar Sikkim & Uttarakhand. Assistance for reconstruction and rehabilitation in Himachal Pradesh.
- Taxonomy for Climate Finance: Government will develop a taxonomy for climate finance for enhancing the availability of capital for climate adaptation and mitigation related investments.
- Skilling the workforce to create employment opportunities: For raising participation of women in the workforce the budget aims to organize women-specific skilling programmes and promotion of market access for women SHG enterprises. 1000 Industrial Training Institutes are likely to be upgraded for this purpose.
- MSME Units for Food Irradiation Quality & Safety Testing: Financial support for setting
 up of 50 multi-product food irradiation units in the MSME sector will be provided.
 Setting up of 100 food quality and safety testing labs with NABL accreditation will be
 facilitated.
- Water Supply and Sanitation: In partnership with the State Governments and Multilateral Development Banks Government will promote water supply sewage treatment and solid waste management projects and services for 100 large cities through bankable projects. These projects will also envisage use of treated water for irrigation and filling up of tanks in nearby areas.

2.2 Highlights related Agriculture & Farm Sector

Priorities identified for Agricultural Sector:

- Transforming Agricultural Research
- Release of New Varieties
- Natural Farming
- Mission for Pulses and Oilseeds
- Vegetable Production and Supply Chains
- Digital Public Infrastructure (DPI) for Agriculture
- Shrimp Production and Export.

Focus Areas:

- Productivity and resilience in Agriculture
- Employment & Skilling
- Inclusive Human Resource Development and Social Justice
- Manufacturing & Services

- Urban Development
- Energy Security
- Infrastructure
- Innovation Research & Development and
- Next Generation Reforms

3. Policy Initiatives - RBI

- Master Circular on Lead Bank Scheme SHG- Bank Linkage Programme and Deendayal Antyodaya Yojana - National Rural Livelihoods Mission (DAY-NRLM) SHG - Bank Linkage consolidating the relevant guidelines/ instructions issued by Reserve Bank of India.
- RBIs Green Deposit Framework The Green Deposit Framework by RBI is designed to
 encourage regulated entities (REs) in India such as scheduled commercial banks and
 deposit-taking non-banking financial companies to offer green deposits. These deposits
 are earmarked for financing projects that contribute to environmental sustainability such
 as renewable energy energy efficiency and pollution control. REs must develop and
 publicly disclose a comprehensive policy and financing framework detailing how funds
 will be allocated and managed.
- Unified Lending Interface (ULI): The Reserve Bank of India (RBI) as part of its strategy
 to create digital public infrastructure in the country has announced re-engineering of
 setting up of a new technology platform called the Unified Lending Interface (ULI) which
 will enable friction-less credit to farmers and MSME borrowers to begin with. The eKCC
 Portal developed by NABARD has already been integrated with the ULI for fetching and
 validation of land records to facilitate dispensation of crop loans to farmer members of
 cooperatives.

4. Policy Initiatives - NABARD

- NABARD provides Short Term refinance to Cooperatives RRBs and SFBs for their crop loan lending. To ensure increased and uninterrupted credit flow to farmers as also to give a boost to capital formation in agriculture sector NABARD provides refinance to the Commercial banks cooperative banks and RRBs.
- Schematic Refinance for Water Sanitation and Hygiene (WASH): To provide clean water sanitation and hygienic conditions to rural and semi urban areas and thereby to protect human health during outbreak of infectious disease NABARD introduced a special refinance scheme on Water Sanitation and Hygiene (WASH).
- Special Refinance Scheme (SRS) on PACS as MSCs: NABARD introduced Special Refinance Scheme to saturate all the potential PACS for conversion as Multi Service Centres over a period of three years commencing from the year 2020-21.
- New Agriculture Marketing Infrastructure sub scheme of Integrated Scheme for Agricultural Marketing (ISAM): GoI had approved the continuation of the scheme till 31 March 2026. The scheme lays special focus on developing and upgrading of Gramin Haats as GrAMs through strengthening of infrastructure.
- Agri Clinics and Agri Business Centres (ACABC): The Central Sector Scheme of Agri-Clinics and Agri-Business Centres was launched in April 2002 by Ministry of Agriculture GoI. Composite subsidy of 44% of the project cost for women SC/ST & all categories of candidates from Northeast and Hill states and 36% of project cost for all other

beneficiaries is provided under the scheme.

- NABARD implements crop loan interest subvention scheme of GoI for Cooperative Banks and RRBs under which interest subvention of 1.5% is provided to banks for extending crop loans up to 3 lakh at a concessional interest rate of 7% per annum. The scheme also provides an incentive of 3% subvention to the farmers making prompt repayment of loans thereby making credit available at an effective interest of 4% per annum.
- NRLM Interest Subvention: NABARD also implements interest subvention scheme under DAY-NRLM for Cooperative Banks and RRBs. NABARD has developed a web portal for NRLM Interest Subvention claims by RRBs and Cooperative Banks in respect of WSHGs financed by them under DAY-NRLM.
- GoI introduced Sugar Ethanol Interest Subvention scheme in 2018-19 with a view to
 increase the production of ethanol and its supply under the Ethanol Blended Petrol
 (EBP). NABARD is the nodal agency responsible for managing the Sugar Ethanol Interest
 Subvention Scheme of the Department of Food and Public Distribution (DFPD)
 Government of India. NABARD has launched a sugar ethanol portal to speed up the
 claims settlement process.
- RIDF instituted in NABARD during 1995-96 with the main objective of providing loans to State Governments for completing ongoing rural infrastructure projects at present covers as many as 39 activities classified under three broad sectors viz. (i) Agriculture and Related sector (ii) Social Sector and (iii) Rural Connectivity.
- NABARD has been extending grant support to partner agencies for promotion and nurturing of SHGs training and capacity building of SHG members and other stake holders besides initiating special programmes for backward regions. A few recent initiatives taken under micro credit are as under:
- Scheme for grant support to SHGs/ JLGs/ POs/ Micro entrepreneurs for training on onboarding onto E-Commerce platforms/ ONDC/ social media platform.
- Scheme for Grant Support to SHGs/ JLGs/ POs for Physical Marketing of Products.
- NABARD in 2023-24 announced guidelines for a pilot project to be taken up by Regional
 Offices titled m-Suwidha (Microenterprises through Skill Upgradation for Women) to
 support need based and location specific developmental projects by strategizing end-toend interventions.
- Real-time banking solution for SHGs (Money Purse Application).
- Pilot Project Graduated Rural Income generation Project (GRIP): A pilot project to build capacities and enable asset generation by ultra-poor rural women and graduating them to access formal financial services through the innovative concept of returnable grant was sanctioned during 2023-24.
- Marking a strategic alliance to benefit rural women SHGs NABARD and the National Rural Livelihood Mission (DAY-NRLM) under the Ministry of Rural Development GoI inked a landmark MoU on 27 February 2024.
- Support for the Deployment of micro-ATMs to two District Central Co-Operative Banks in Gujarat with a grant support of

- 3.67 crore for deploying 1631 micro ATM devices at PACS (440) and cooperative milk societies (1191).
- Financial Inclusion under Special Campaign 3.0: RRBs under guidance of NABARD conducted Special Financial Literacy Camps during October 2023.
- Support under Financial Inclusion Fund (FIF) for Rural Connectivity-HTS-VSAT Dual LTE and SD WAN technologies: Incentive Scheme for BCs operating in NE States and hilly states.

5. Participatory Sustainable Groundwater Management in Overexploited Blocks/Watersheds:

A pilot project titled "Participatory Sustainable Groundwater Management in Overexploited Blocks/Watersheds" has been launched in five states: Punjab Haryana Rajasthan Uttar Pradesh and Tamil Nadu. This innovative pilot initiative by NABARD is the first of its kind aimed at demand side management of water at the micro-watershed/village level.

6. Participatory Sustainable Groundwater Management in Overexploited Blocks/Watersheds:

A pilot project titled "Participatory Sustainable Groundwater Management in Overexploited Blocks/Watersheds" has been launched in five states: Punjab Haryana Rajasthan Uttar Pradesh and Tamil Nadu. This innovative pilot initiative by NABARD is the first of its kind aimed at demand side management of water at the micro-watershed/village level.

7. Expansion of JIVA:

Based on the success of the pilot phase JIVA is being expanded to 25 new projects in central eastern and north-eastern states to further widen and deepen the programme focusing on completed or near-completion watershed/spring shed and tribal development projects with thrust on districts identified under aspirational / low priority sector lending districts.

8. Accelerator approach for growth of FPOs:

NABARD has come up with FPO accelerator programme which is a structured framework to empower FPOs by providing access to specialized training mentorship and resources envisaging the enhancement in FPO's operational efficiency adopt modern agricultural techniques and navigate market complexities

9. Saturation Drive campaign:

Government has launched the saturation drive to provide FPOs benefits of schemes of Agriculture department in the form of licenses of inputs seeds fertilizer etc. FPOs will also be linked to mandis facilitated with registrations under GST FSSAI and onboarding on platforms like ONDC and other E-retailing platforms for sale of their produce.

10. National FPO Policy:

MoA&FW GoI is working on finalization of a National Policy on FPOs to create a supportive environment for the FPOs after ongoing deliberations and consultative meetings on the draft policy.

11. Climate Action and Sustainability:

NABARD is a Direct Access Entity (DAE) to the Green Climate Fund (GCF) and the National Implementing Entity (NIE) to Adaptation Fund (AF) and National Adaptation Fund for Climate Change (NAFCC).

12. Off Farm Sector Development:

Capacity Building Fund Social Stock Exchange (CBF-SSE): The Capacity Building Fund of Social Stock Exchange (CBF-SSE) was set up in NABARD with funding to be contributed by NABARD SIDBI BSE NSE and Other CBF is being used to improve the ability of all stakeholders to navigate through the operational dynamics of SSE understand the nuances processes instruments etc.

13. Gram Vihar New Scheme for promotion of Rural Tourism:

A new scheme in the name of "Gram Vihar" has been introduced to give a fillip to the rural tourism sector in the country by promoting "homestay" wherein tourists stay with the local families and experience rural lifestyle as well as "away-day" i.e. one-day trip without night stay.

14. Agriculture Credit during 2023-24:

Disbursement of agriculture credit during 2023-24 was 25.10 lakh crore as against target of 20.00 lakh crore indicating achievement of 125%. Commercial Banks RRBs and Co-operatives accounted for 75% 13% and 12% of the total disbursement respectively.

15. Technology Facilitation Fund (TFF):

NABARD has set up a Technology Facilitation Fund (TFF) with a corpus of 50 crore. The fund is focused on providing support to tech start-ups working in agriculture and rural development sector. The fund provides a range of flexible support mechanisms including grants loans equity and convertible grants designed around the needs of each start-up.

16. Govt Sponsored Programmes linked with Bank Credit

• Policy Initiatives – State Govt. (including Cooperatives)

Holistic Agriculture Development Programme (HADP) Agriculture & allied sectors contribute to 18% of the GDP of J&K, amounting to Rs.37600 crore per year and provides livelihood to 13 lakh families. In order to provide the necessary thrust to this sector, J&K Govt. has commenced the Holistic Agriculture Development Programme (HADP) across the UT, with an outlay of Rs.5013 crore over a period of 5 years. The 29 projects under the programme are expected to transform the agrarian economy of J&K through doubling of output, boosting exports and making the sectors sustainable & commercially viable.

• Aspirational Panchayat Development Programme (APDP):

The UT Govt. has launched the "Aspirational Panchayat Development Programme (APDP)" for the development of 285 backward panchayats. A total of 100 indicators have been identified across 9 Sectors i.e. Agriculture & allied (06), Health & Nutrition (11), Education (13), Rural Development & Sanitation (07), Beneficiary-Oriented Schemes (04), Skill Development (04), Basic Infrastructure (17), Environment (05) & Good Governance (33).

• Digital Villages:

The UT Govt. has implemented "Back to Village via Digital Means" in 44 villages of 20 districts of J&K on pilot basis. Each digital village is an administrative unit, connected to the Block, District and UT administration.

17. Status of Co-operatives in J&K:

- The UT has a mixed Short Term Co-operative Credit Structure comprising of one State Co-operative Bank, 3 DCCBs and 589 PACS with co-existent two tier and three tier co-operative structures. The JKStCB is unscheduled and all the three DCCBs are unlicensed as on 31 March 2023. The Apex Bank i.e. J&K State Co-operative Bank and three District Central Co-operative Banks viz., Anantnag CCB, Baramulla CCB and Jammu CCB are operational in the UT of J&K.
- As per NCD portal, there are 4288 Panchayats in the UT, out of which 1587 panchayats (37%) are covered by PACS and 2701 (63%) are not covered. There are a total of 599 PACS in the UT with highest concentration in Jammu (118).
- J&K government has ensured the adoption of model bye-laws in all the PACS of the UT.
- The UT government is implementing the PACS computerization project across the state for 537 PACS. Apart from this, other schemes/projects of the Ministry of Cooperation like the World's Largest Grain Storage, Jan Aushadi Kendra etc. are also being actively implemented by the UT government.
- The UT government is also engaged in the upgradation of assets of Co-operative Institutions and Departmental offices on a regular basis.

18. Jammu and Kashmir New Industrial Policy:

The policy is operational from 01.04.2021 to 31.03.2030 and aims to transform the UT into an industry friendly territory. The Govt. intends to develop Industrial Land Bank across the UT. The focus sectors include Manufacturing, Agri. and food processing, Medicinal Plants, Milk, Poultry and Wool Production, Horticulture, Post-Harvest management, Handloom and Handicrafts. Benefits available under the Policy are subsidy on DG Sets @100% Exemption in Subsidy @100% on Stamp duty and Court fee on land transactions in Govt. Industrial Estates Subsidy on Procurement of Quality Certificate and subsidy on automation @25%. As regards Marketing Support, the UT Govt. has initiated the process for industrial trade fairs and marketing events for MSMEs. An Entrepreneur and Skill Development Fund shall be created for incorporating entrepreneurial skills to the local youths.

19. Mission YUVA:

The Government of J&K is in the process of implementing Mission YUVA project in the UT. This programme encompasses to establish Jammu and Kashmir as a hub of enterprises and employment. The programme aims to create gainful livelihood opportunities across sector over a period of five years through entrepreneurship by:

- Creating over 250000 new enterprises across various sectors.
- Generating over 750000 new employment opportunities through these enterprises.

- Creating a cross-sectoral business support ecosystem at the ground level.
- Developing a skilled workforce equipped with 21st-century skills.

20. State Budget

Important Announcements

- New initiative for development of infrastructure and basic amenities in 12 off-beat tourist destinations, 6 each in Jammu and Kashmir divisions, with objective of enhancing tourism appeal and expanding local business and job opportunities.
- Planting of 190 lakh native trees and 100 lakh low cost greening interventions aimed to restore ecosystems, prevent soil erosion and enhance biodiversity.
- 10 lakh saplings of local, medicinal and economic importance species to be distributed among the farmers for planting to augment trees outside forests and improve livelihood.
- Implementation of Van se Jal, Jal se Jeevan, an innovative water conservation technique through water shed management approach, promote sustainable agricultural practices and revitalize traditional water bodies, including wetlands.
- Construction of 6 Grain storage units in 6 districts which are deficit in grain storage facility under the Scheme "Worlds Largest Grain Storage".
- Two Cancer Institute's at Jammu and Srinagar to be made fully operational during 2024-25. AIIMS, Awantipora to be made functional by March 2025.
- Infrastructure of 389 schools to be upgraded under Pradhan Mantri Schools for Rising India (PM SHRI) Scheme.
- 186 villages, having 500 schedule tribe population, to be covered under "Pradhan Mantri Adi Adarsh Yojana (PMAAGY)" scheme.
- 75 lakh youth engagement in various sports events to be held at the Panchayat, Block, District, UT and National level during 2024-25.
- New initiative to create ecosystem for promotion of enterprises and self-employment, generate over 5 lakh opportunities for self-employment and expand investments through credit support.
- Additional 10 kg of rice per month to Priority Households will be provided under Prime Ministers Food Supplementation Scheme.
- Implementation of underground cabling project to extend the Grid connectivity to Holy Shri Amarnath Ji cave on both the axis (Baltal and Pahalgam).
- Out of 3,256 water supply schemes under Jal Jeevan Mission (JJM), 776 schemes have been completed and remaining 2,480 schemes have been targeted for completion for coverage of balance 4.26 lakh households with Household Tap Functional Connections (FHTCs) to achieve 100% coverage under tap water connections.
- 450 water supply schemes under languishing programme and 159 water supply schemes under National Bank for Agriculture and Rural Development (NABARD) loan assistance

are targeted for completion in 2024-25.

- Under Smart Cities Mission out of 309 projects, 223 projects have been completed and 86 projects likely to be completed in 2024-25.
- Implementation of Van se Jal, Jal se Jeevan, an innovative water conservation technique through water shed management approach, promote sustainable agricultural practices and revitalize traditional water bodies, including wetlands.
- Construction of 6 Grain storage units in 6 districts which are deficit in grain storage facility under the Scheme "World's Largest Grain Storage".
- Two Cancer Institute's at Jammu and Srinagar to be made fully operational during 2024-25.
- AIIMS, Awantipora to be made functional by March 2025.
- Infrastructure of 389 schools to be upgraded under Pradhan Mantri Schools for Rising India (PM SHRI) Scheme.
- 186 villages, having 500 schedule tribe population, to be covered under "Pradhan Mantri Adi Adarsh Yojana (PMAAGY)" scheme.
- 75 lakh youth engagement in various sports events to be held at the Panchayat, Block, District, UT and National level during 2024-25.
- New initiative to create ecosystem for promotion of enterprises and self-employment, generate over 5 lakh opportunities for self-employment and expand investments through credit support.
- Additional 10 kg of rice per month to Priority Households will be provided under Prime Ministers Food Supplementation Scheme.
- Implementation of underground cabling project to extend the Grid connectivity to Holy Shri Amarnath Ji cave on both the axis (Baltal and Pahalgam).
- Out of 3,256 water supply schemes under Jal Jeevan Mission (JJM), 776 schemes have been completed and remaining 2,480 schemes have been targeted for completion for coverage of balance 4.26 lakh households with Household Tap Functional Connections (FHTCs) to achieve 100% coverage under tap water connections.
- 450 water supply schemes under languishing programme and 159 water supply schemes under National Bank for Agriculture and Rural Development (NABARD) loan assistance are targeted for completion in 2024-25.
- Under Smart Cities Mission out of 309 projects, 223 projects have been completed and 86 projects likely to be completed in 2024-25.
- Under Jammu and Kashmir Rural Employment Generation Programme (J&K REGP), 1,372 units are targeted to be setup during 2024-25.
- 4000 AC agriculture pumps to be replaced by Solar Pumps in phased manner under PMKUSUM Component "C".

• Around 04 MW rooftop solar power plants to be installed on the Government buildings. 22,494 Government buildings to be 100% solarized in phased manner.

21. Highlights related Agriculture & Farm Sector

- Establishment of 2,000 Kisan Khidmat Ghars (KKGs) for providing facilities to the farming community at their door step. Reinvigorating Agriculture and allied sectors through Holistic Agriculture Development Programme (HADP) by strengthening seed systems, boosting production and productivity, creating agri-business ecosystems and securing livelihoods through enhanced jobs and income creation.
- Strengthening of Departmental Seed Multiplication Farms.
- Competitiveness Improvement of Agriculture and Allied Sectors project in Jammu and Kashmir (JKCIP) to be implemented with an estimated value of USD 100 million loan from International Fund for Agricultural Development (IFAD). The goal of the project is to contribute to the sustained increase in income of rural households by improving the competitiveness of farming operations.
- 20 agriculture and allied sector products have been identified, out of which 05 products (Saffron, Sulai Honey, Muskhbudgi Rice, Bhaderwah Rajmash and Udhampur Kalari) have got geographical indication (GI) registration and rest are under process.
- Distribution of farm machinery benefitting 70,000 farmers.
- 25,000 MTs of Controlled Atmosphere (CA) storage capacity to be added.
- Development of Chrysanthemum theme Park at Cheshmashahi Srinagar.
- 3,000 dairy units to be established providing direct employment to around 4,000 people.
- Increase in milk production from 25 to 45 lakh Metric Ton and increase in milk collection/chilling from 2.0 to 8.5 lakh Litres Per Day (LLPD) over a period of five years.
- 100 satellite heifer rearing units will be established in the private sector.
- 1,800 Pashu Sakhis will receive incentives for ration balancing for 6,00,000 cows and for the milk recording programme of 30,000 dairy cows.
- 60,000 backyard poultry units will be established in rural areas.
- Hybrid fodder seed kits will be provided for 3,600 hectare of land.
- 100 hydroponic fodder units and 60 silage-making units, along with 6 fodder depots to be established to ensure availability in fodder-deficient areas.
- Fish Production to be enhanced from 30,670 MT to 35,250 MT with technological interventions.

22. Highlights related to Rural Development & Non-Farm Sector

• Under Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA), 400 lakh mandays to be generated.

- 12,000 additional Self Help Groups (SHGs) to be formed during 2024-25.
- 600 new panchayat ghars to be constructed under Rashtriya Gram Swaraj Abhiyan (RGSA) with 100% internet connectivity.
- 2.60 lakh mandays of training to Panchayati Raj Institution (PRI) members under Rashtriya Gram Swaraj Abhiyan (RGSA).
- 80,000 houses to be constructed under Pradhan Mantri Awas Yojana Gramin (PMAY-G).
- 06 Villages to have solid/liquid waste management facilities in order to become clean with litter and plastic free.
- 26,000-hectare area to be treated with completion of 1,800 works under Integrated Watershed Management Programme (IWMP) during 2024-25.
- Development of Duggar Dani village at Samba with the traditional set up in the form of "mock village".
- Enhancing avenues of livelihood generation through involvement of the Panchayat Level Biodiversity Management Committees (BMCs) and integrating them with Self Help Groups (SHGs) registered with NRLM for sustainable collection and disposal of forest produce.
- 653 Anganwadi Centres (AWCs) have been targeted for upgrading as Bal Vidyalayas.
- 186 villages having 500 schedule tribe population, to be covered under "Pradhan Mantri Adi Adarsh Yojana (PMAAGY)" scheme.
- Training of 6,000 women Self Help Groups registered with NRLM to be completed.
- Rs.1000 crore new road and bridge projects to be taken up under NABARD loan assistance under RIDF Tranche XXX during 2024-25.
- 5,000 improved biomass cook-stoves to be provided in the tribal areas to reduce indoor air pollution and fuel use.

23. Govt. Sponsored Programmes linked with Bank Credit

Handicrafts/ Handloom Sector

- Wool Processing, Handicrafts and Handloom Policy, 2020 The Policy aims at sustainable development of wool, silk, handloom and handicraft sectors in the UT and employment generation. The policy is valid for a period of 10 years from the date of Notification.
- The major objectives of the policy are to maximize the net income, set up wool processing restructure the wool sector, conduct of Handicraft/ Handlooms census, establishment of Mega Craft Cities and welfare measures for weavers and craftsmen.
- Incentives for Handicrafts sector include capital subsidy @10% of the working capital for one year not exceeding Rs.5.00 lakh, 50% marketing support for registration of crafts on e-platforms, promotion of GI certified units, enhancement of loan amount under Artisan Credit Scheme, enhanced financial support under Managerial Subsidy, stipend for

advance training, promotion of hand-made products, Jammu Haat, with the support of financial institutions and banks.

- Incentives for Handloom Sector include capital subsidy @10% of the working capital for one year not exceeding Rs. 5.00 lakh, enhancement of loan amount under Micro Credit Plan scheme, increase in interest subvention from 3% to 5% on working capital, improvement in scholarships for weaver families, marketing support for registration of crafts on e-platforms websites, with the support of financial institutions in the UT.
- Jammu and Kashmir Poultry Policy 2020 has been announced to promote the establishment of poultry units. The policy envisages self-sufficiency in the production of poultry and poultry products, creation of employment opportunities for local unemployed educated youth and promotion of backyard poultry. The objectives of the scheme are production of 146 Crores of Table eggs and 1.25 lakh MT poultry meat per annum, establish poultry feed manufacturing units, promote backyard poultry, increase the local production, poultry diversification, sustainable commercial broiler and layer production, registration of Poultry Farms, development of a dual purpose breed and improvement of indigenous poultry germplasm. Incentives under the Scheme include capital investment incentives, interest incentive @3% on working capital, 100% insurance premium, 100% subsidy on DG sets for Commercial layer/Broiler farming purpose for eligible units, 50% subsidy on incinerator etc.

24.Incentives/Schemes for Dairy Sector

The incentives/schemes provided by the UT Govt. for dairy sector is as follows:

- Integrated Dairy Development Scheme (IDDS) for dairy units, milk collection units, market infrastructure, Milk ATMs.
- Feed & Fodder Development Scheme (2020-21) for quality fodder production.
- Incentives/Schemes for Fisheries Sector:
- GoI is implementing various schemes for the development of fisheries sector. The following Centrally Sponsored Schemes are operational in the UT:
- Development of Inland Fisheries and Aquaculture for development of fisheries in natural waters.
- PMs Package for creation of employment opportunities for propagation of fish culture in the private sector.
- Fisheries Training and extension for providing technical know-how, fish seed etc. to progressive fish farmers.
- National Welfare Scheme for Fishermen for low cost houses.
- Accident Insurance scheme for active Fishermen for insurance cover to professional fishermen.
- Rashtriya Krishi Vikas Yojana (RKVY) for establishment of Carp and Trout Rearing Units.

Chapter 2

Credit Potential for Agriculture

2. Farm Credit

2.1.1 Crop Production, Maintenance & Marketing

2.1.1.1 Status of the Sector in the District

The District economic is predominantly dependent of agriculture and about more than 90% of the population is directly or indirectly dependent on agriculture. The land holdings in the district are very small with an average of 0.95 Ha. The climate of the district ranges from Humid to Cold Arid falling under PAZ1-Western Himalayan Region Agro Climatic Zone and hence distribution of rainfall and sowing seasons vary from region to region. Area under various crops is almost stagnating and there is little scope for horizontal expansion. Therefore, the growing demand for food grains will have to be met by increasing the productivity. However, only 9% area is under irrigation and remaining 91% is rain-fed.

The major crops are Maize, Wheat, Paddy and Pulses. The total cropped area and net sown area in the district are 105880 ha and 53727 ha, respectively. The net irrigated area (NIA) is 4889 ha. and the rest is rainfed.

Millets are not traditionally grown on a large scale in Rajouri district, as the main staple crops are typically maize, wheat, and rice. However, with increasing awareness of climate resilience and nutritional benefits, there has been growing interest in introducing and expanding millet cultivation in Rajouri.

2.1.1.2 Infrastructure and linkage support available, planned and gaps

For seeds / planting material, there are 95 outlets in the district. The Department of Agriculture distributes certified seeds as per the approved seed replacement rate through Agricultural Extension Centers (AEC) / their depots.

Fertilizers are sold to farmers through private dealers and co-operative societies. Further, various Central Sector Schemes, Schemes under UT Capex Budget for Promotion of Organic farming, Intensive Vegetable Development Programme, Promotion of Spices & Condiment etc. Further, the recently launched Holistic Agriculture Development project launched by the UT Govt. for promotion of Agriculture and Allied activities also provides necessary support to the farmers under various components like Development of Seed and Seed Multiplication chain in PPP mode, Promotion of Niche crops, Promotion of Vegetables/exotic vegetables under open & hi-tech protected cultivation, Farm mechanization and automation, Promotion of Oilseeds etc.

2.1.2 Water Resources

2.1.2.1 Status of the Sector in the District

The total cropped area in the district is 1.05 lakh ha and the area available for irrigation is 0.58 Lakh Ha. The irrigated area is only 0.04 ha which is very less. Groundwater irrigation is almost negligible in the district because groundwater availability is very limited due to, especially in hilly areas. Shallow aquifers are present but are highly dependent on rainfall for recharge. Rajouri district is traversed by several small rivers and streams, with the Rajouri River being the main water source for irrigation and drinking water. Other smaller streams flow from the Pir-Panjal range, contributing to local water needs, but they often experience seasonal fluctuations and reduced flow during dry periods. The available sources of surface water need to be further

exploited in order to optimize the surface water availability. According to the 2023 report on groundwater survey, all the 19 blocks of the District Rajouri are classified as safe. The stage of ground water development is 10.56%. The annual ground water recharge is 0.33 BCM and the Annual Extractable Ground Water Resource is 0.29 BCM.

2.1.2.2 Infrastructure and linkage support available, planned and gaps

The district does not have adequate facility for irrigation. The Net Irrigated Area in the district is 9% of the net sown area. Canals is one main source of irrigation. A total of4889 ha of land is being irrigated by Canals, however due to earthen nature of canal, most of the canals damaged which leads to excessive wastage and leakage of water, due to which full irrigation potential not utilized. These canals can be renovated through Rural Infrastructure Development Fund (RIDF) of NABARD. The Agriculture /Horticulture Department focus on promoting The Per Drop More Crop (PDMC) scheme under PMKSY in the district that focuses on micro irrigation, including drip irrigation, to improve water use efficiency at the farm level. Demonstration farms need to be established to promote awareness among farmers. Under HADP Promotion of Microirrigation and Creation of irrigation sources (Bore Wells), Water Storage Structures- Storage Tanks, Portable Geo Tanks Roof-top Rain Water Harvesting Structures, Poly Tanks/flexi water tanks, Gravity feed drip irrigation systems shall be promoted over the next 5 years in the district.

2.1.3 Farm Mechanization

2.1.3.1 Status of the Sector in the District

The district is hilly and size of agriculture fields is very small. Hence, there is limited scope for all types of technological intervention. However, Power Tiller has scope in all areas. Further, tractor has a role to play in some of the Blocks such as Sunderbani, Nowshera and parts of Lamberi. Further, the Government of India has set an ambitious target of increasing agricultural power from 2.76 kilowatts per hectare to 4 kilowatts per hectare by 2030. With this level of agricultural power availability, agricultural productivity can go up to 4.2 tons per hectare. Additionally, Agricultural Mechanization provides several financial and social benefits to farmers apart from increasing agricultural productivity. It results in 15 to 20 percent savings in the use of fertilizers and seeds, and 20 to 30 percent savings in labor and operational time.

Additionally, there is an increase of 5 to 20 percent in cropping intensity and an enhancement of 10 to 15 percent in agricultural productivity. Since Rajouri is a hilly district, use of smaller machines suitable for horticulture operations in the hills / mountains may result in enhancing effectiveness and increasing farm income. The farm mechanization will help to enhance the overall productivity and production with the lowest cost of production.

2.1.3.2 Infrastructure and linkage support available, planned and gaps

The availability of Dealers / Suppliers of tractors, servicing/repair facilities and spares for the machinery are very limited in the district. Some agricultural implements like power tillers, tractors, etc. are sold by Agriculture Department at subsidized rates. By and large the remote areas do not have access to them. There is lack of awareness about new implements e.g. Zero Tillage technology which results in lowering cost of cultivation and increasing productivity In order to ensure Farm Mechanization for Resource Use Efficiency in Hill Agriculture in the district, the HADP scheme has been designed to provide Farm Machinery Banks, Custom Hiring Centres and Improved Mechanisation Level and Farm Power implements like Brush cutters, Vertical conveyer Reaper, Tractor Operated mower, Tractor operated pruning machine etc. shall be provided.

2.1.4 Plantation & Horticulture, including Sericulture

2.1.4.1 Status of the Sector in the District

The climatic conditions of district Rajouri are favourable for horticulture development. The district has orchards of various fruit varieties but plantation is in a scattered manner. The plain areas of Sunderbani, Kalakote, Nowshera, Rajouri and Manjakote grow fruit trees of various species like plum, peach, apricot, mangoes, gauva and lemon whereas in areas situated at high altitude like Budhal and Thanamandi, walnuts and pears are also grown. The total area under Horticulture crops in the district is 15,899 Ha. With regards to the dry fruits, the total area covered stands at 4595 Ha. The major dry fruits grown are Walnut and Almond of which walnut accounts for maximum area i.e 4832 Ha. Apart from fruit crops, the conditions prevailing in the district are also favourable for non-traditional horticulture activities like, commercial production and processing of mushroom, medicinal and aromatic plants, like Aloevera, Harad, Behera, Ashwagandha, etc.

2.1.4.2 Infrastructure and linkage support available, planned and gaps

The District has 05 nurseries, out of which 04 are government and 01 is private. These nurseries supply planting materials to the horticulture farmers of the district. The Horticulture Department has nurseries – cum - orchards for supply of quality planting materials. Vegetables such as potatoes, cauliflower, tomatoes, and cabbage are grown, catering to local markets and some neighboring areas. There is potential to expand vegetable farming, particularly through polyhouse cultivation and other protected cultivation practices to extend growing seasons. The district does not have any cold storage facility. The J&K Horticulture and Marketing Planning Department provides post-harvest and marketing support to the fruit growers in the district. The total plants raised by the nurseries during the year 2022-23 stood at 1.30 lakh and the total plants distributed stood at 1.21 lakh in 2022-23.

2.1.5 Forestry & Waste Land Development

2.1.5.1 Status of the Sector in the District

Presently, the agriculture sector is confronted with issues like practice of mono cropping, reduction in per capita land holding (approx. 1 ha) increase in number of Marginal and Small farmers as there is a limited scope for horizontal expansion of land for agriculture purpose, high dependency on monsoon with assured irrigation facilities only available in 9% of the net sown area, climate risk, etc. Thus, the economics does not get much in favour of the sector which harbours almost 50% of the population. For mitigating risks viz. economic as well as environment and for better returns, one of the viable options could be 'Agro- Forestry' which has traditionally been a way of life and livelihood in India for centuries. The role of agroforestry in improving land productivity, soil conservation, bio-amelioration, climate moderation, and increasing farmers' income is widely acclaimed. There can be various elements of Agro-Forestry System. However, the basic element is 'Agriculture' which in broader sense encompasses agronomic crops horticulture activities & animal husbandry activities integrated with trees or woody perennials. The system can also facilitate additional income generation through Integrated Farming with elements like poultry, mushroom growing, fish farming, beekeeping, sericulture etc.

2.1.5.2 Infrastructure and linkage support available, planned and gaps

• In Rajouri district, approx.o.96 lakh ha of area is forest land, which constitutes 37.44% of the geographical area. In the district, cultivable wastelands and current fallow lands are available which offer good potential for raising various tree species like Bamboo, Jatropha, etc. In addition, there is also some scope for diversification of agriculture to agro-forestry. Under farm forestry, farmers commonly grow Poplar on

bunds/ wastelands. The main species that can be raised with bank finance are Neem, Casuarina, Teak, Forest Nursery and Eucalyptus. The forest nurseries can also be set up with bank finance. The Department is providing free technical guidance and supplying quality planting material at the subsidized rates to the farmers. For production and supply of plants, the department has established two forest nurseries in the district.

During 2022-23, 8000 forest plants were planted to rehabilitate the degraded area. No
wood based industries and no effective marketing tie-up is available. Banks are not
inclined to finance long gestation forestry activities. There is no support price
mechanism by the UT Government for the forest produce as in the case of other States.

2.1.6 Animal Husbandry – Dairy

2.1.6.1 Status of the Sector in the District

The dairy sector in Rajouri district is an important livelihood source for many rural households and has seen a gradual increase in production due to local demand and supportive government programs. The agro-climatic conditions of the district are suitable for rearing crossbred and indigenous milk producing animal breeds. Additionally, a large portion of the rural population in the district comprises small and marginal farmers or landless laborers who can substantially engage in the economic activities of the area/block through animal husbandry. According to the Livestock Census 2019, there are approximately 1.07 lakh cows and 1.48 lakh buffaloes in the district. In the district, milk production is mainly for domestic consumption and local marketing. The rural milk trade is carried out by local milkmen, and the milk marketing network is not well-developed. The total milk production in the district is around 135 thousand MT. During the last few years, the milk yield has increased in the district on account of the efforts of the department and Area Based Development Scheme on dairy launched by NABARD and also due to purchase of cross bred cows yielding 10-15 liters of milk per day through dealers from Punjab/Haryana and other neighboring states under Integrated Dairy Development Scheme of the UT Government.

2.1.6.2 Infrastructure and linkage support available, planned and gaps

Infrastructure available in the district in this Sector is as under:

- Veterinary Hospitals: 1
- Veterinary Dispensaries: 114
- Artificial Insemination Centers: 77
- Animal Breeding Farms: 2
- Dairy Cooperative Societies: 39
- Milk Collection Centres: 98

There are 04 milk chilling units in the district with a total capacity of 25 MT. Good quality and adequate quantity of fodder is not available in the district and is procured from nearby district or Jammu. KCC facilities are to Animal Husbandry & Fisheries farmers with benefits of interest subvention (2%) to Banks and Prompt Repayment Incentive (3%) to such of the farmers to meet their working capital needs under Kisan Credit Card Scheme. Accordingly, the farmers already possessing KCC and involved in activities related to animal husbandry and fisheries can avail an additional sub limit within an overall limit of Rs.3 lakh with benefit of interest subvention and prompt repayment incentive. In so far as new KCC holder farmers of animal husbandry and fisheries are concerned, the benefit of interest subvention and prompt repayment incentive will be allowed up to the credit limit of Rs.2 lakh per annum. In the recent time, number of KCC applications under AH and SH has taken a drastic rise in the district.

2.1.7 Animal Husbandry - Poultry

2.1.7.1 Status of the Sector in the District

There is a good demand for poultry products in Rajouri district. It has good potential for broiler units while layer units have limited scope due to climatic conditions. These units may be sustained through sufficient heating arrangements with local low cost methods of controlled conditions. The key to poultry farming depends on the availability of good quality Day Old Chicks (DOC) and feed. For poultry development, investments are being made both for commercial units of 1000 birds and small units of 500 birds. There is good demand for eggs and meat in the district and the farmers are not facing any problem in marketing their poultry products. On the livelihood front poultry activity generates employment opportunities both in rural and urban areas. The key to poultry farming depends on the availability of good quality day old chicks and feed. Total eggs production in the was district during 2022-23 was 140 lakh and total meat production was around 4000 tonnes. Govt. of J&K has announced Poultry Policy 2020 with a view to achieve self-sufficiency in production of poultry and poultry products by way of establishing mega projects like broiler/egg breeder Farms & Hatcheries, Feed mills and commercial layer / broiler farms, creation of employment opportunities for local unemployed educated youth and to supplement the income of rural population by encouraging backyard poultry. The policy aims to bridge the gap between demand and production of poultry products in J&K.

2.1.7.2 Infrastructure and linkage support available, planned and gaps

The district has 79 Poultry Farms both private and government in the district. The Department of Animal Husbandry provides health care services in the district. The feed requirements are met by importing the feed from other districts like Jammu, Kathua etc. Day Old Chicks are being procured either from Jammu or Punjab, which increases the cost. Inadequate veterinary care services in the district. Insurance Companies reluctant in providing insurance cover to Poultry birds.

2.1.8 Animal Husbandry – Sheep, Goat, Piggery

2.1.8.1 Status of the Sector in the District

Sheep and goat rearing is a traditional and important livelihood in Rajouri district, contributing significantly to the rural economy. This practice is well-suited to Rajouris hilly terrain and is a source of income, meat, wool, and manure for the local population. In view of the agro-climatic conditions, topography, grazing lands, etc. sheep are reared for wool and meat purpose. he region is known for breeds like Bakharwal and Gaddi, which are well adapted to mountainous conditions and known for good-quality wool and resilience in harsh climates. Wool production, although secondary to meat, contributes to local cottage industries for woolen products. Local goat breeds, such as the Kaghani and Pashmina goats, are reared for meat and milk. Goat rearing is particularly popular due to the lower input costs and adaptability of goats to the rugged terrain. There is a huge demand of mutton due to climatic conditions prevailing in the district. The local population of sheep does not meet the requirement and sheep are bought into the district from adjoining states like Rajasthan. Presently only 40% demand is met from local production and 60% is purchased from outside the district. The Sheep/Goats serve as a source of subsistence to a large number of rural poor. The small/marginal farmers which constitute more than 36.24% of total population of the district could be engaged in this activity.

2.1.8.2 Infrastructure and linkage support available, planned and gaps

The details of infrastructure available in the district is as under:

• Sheep Extension Centres: 60

Mobile Sheep Extension Centres: 06

The department of Sheep Husbandry has also formulated a Mini Sheep Rearing Farm (MSRF) scheme. The Farmers are coming forward to adopt this scheme. Sheep and goat rearing is being practiced in a scattered manner and there are no organized societies or training facilities. As the district is basically agrarian, the extent of grazing land is also limited. These aspects have to be addressed if the activity has to be taken up on a commercial scale in the district. There is no unit set up in the district to process the wool so that the processed wool may be sold outside J&K for better value and better cost input. Lack of permanent and temporary shelter during upward / downward migration. Quality breeds of goats and sheep are not available in the district. No organized marketing arrangements exist in the district for marketing of meat and wool. Institutional credit for sheep and goat rearing is provided only to a limited extent. To give boost to the sector, the GoI has taken decision to provide KCC limit to the Pig/Sheep/Goat farmers and has directed the banks to provide KCC limit for working capital requirements for the purpose. Interest Subvention at 2% upto 2 lakh is also available under the scheme.

2.1.9 Fisheries

2.1.9.1 Status of the Sector in the District

Fisheries development activity in the district is having immense potential for production of fish in view of the natural streams flowing within the district. There is scope for development of fishpond in the district and this activity can provide good additional income to the farmers. There is a good demand for fish from Army as well from local population in the district. Rajouri has several natural water bodies, such as the Rajouri River and its tributaries, which are suitable for freshwater fish. The streams originating from the Pir Panjal mountains are another resource, but these are generally limited to seasonal flows. The fish production in the district during the FY 2022-23 was 36.71 MT and the activity is mainly being financed by the farmers from their own resources. Common fish species include carp varieties like Rohu, Catla, and Mrigal, as well as trout, which thrives in the cooler, faster-flowing waters in the higher altitudes of Rajouri.

2.1.9.2 Infrastructure and linkage support available, planned and gaps

There are 125 fish ponds in the district constructed under Prime Ministers package and by farmers besides community ponds and local varieties of fish are available. There are two schemes of GoI under RKVY which are at present being implemented. One is Carp Fish Culture and the other is Trout Fish Culture. The Department is providing 80% subsidy for construction of Pond and providing inputs for first year that include stock / seeds, feed, net, etc. Rajouri district has approximately 792 registered fishermen who primarily rely on capture fishing from natural water bodies. The fisheries sector in Rajouri includes two main fish breeding farms—a trout farm in Phalni, Budhal, and a carp farm in Muradpur—which support fish production in the region. As the ponds in the district are rain fed and the rains are scanty, there is poor response for fresh water fish culture.

2.1.10 Farm Credit - Others

2.1.10.1 Status of the Sector in the District

The terrain of the district is hilly and most of the villages are not accessible through as road connectivity is not sufficient. Therefore, movement of agriculture produce from farm to the market/farmers house is only by means of

work/pack animals. The bullocks and other work animals are being frequently used in agriculture operations in view of small size of land holdings. The mules, ponies etc. are also used in the district especially in hilly areas for purpose of transportation of agriculture

produce to the nearby markets. As these animals are in good demand, there is a need for giving a boost to this activity.

2.1.10.2Infrastructure and linkage support available, planned and gaps

Most of the farmers of the district are small and marginal and require animals for ploughing their land. Farm produce and other goods are transported through mules and ponies in remote areas and even in areas near to towns. Animal Husbandry Department is the Nodal Agency for development of this activity in the district. The good quality animals are not locally available and as such there is a need for the department to consider setting up its own Animal Breeding farms to supply good quality animals. The veterinary facilities available in the district are quite adequate to take care of the requirements of these animals.

2.1.11 Sustainable Agricultural Practices

2.1.11.1 Status of the Sector in the District

At present, farmers concentrate mainly on crop production which is subject to uncertainty in income and employment. In this context, integration of various agricultural enterprises has great potential to supplement farmers income and increase family labour employment. An Integrated Farming System (IFS) is defined as a judicious combination of two or more components using cardinal principles of minimum competition and maximum complementarity with advanced agronomic management tools aiming for sustainable and environment friendly improvement of farm income, family nutrition and ecosystem services. Assessment of farm incomes indicate that diversified farms with more than two enterprises get twice the income than those with two or less enterprises. Scientifically designed IFS with minimum competition and maximum complementarity are essential to achieve multiple goals.

The advantages of IFS are indicated below:

- Soil fertility and productivity enhancement through organic waste recycling and increased sustainable farm income Integrated farming system shall meet the energy and timber needs of rural households and also timber needs of construction sector in a cost effective manner.
- Higher food production to equate the demand of the exploding population The various components of IFS are crops, live stocks, birds and trees.
- The crops may have subsystem like mixed/intercrop, multi-tier crops. The livestock components may be milch animals, goat, sheep, poultry.

2.1.11.2 Infrastructure and linkage support available, planned and gaps

Finance for various components of IFS simultaneously and parallelly is not forthcoming. Also, the marketable surplus with SF/MF may be small and therefore needs aggregation. Initiation of Mission on Integrated Farming Systems in the district by converging various schemes of crop husbandry, horticulture, livestock, and fisheries can give impetus to integrated farming systems approach.

2.1.12 Agriculture Infrastructure- Construction of Storage and Marketing Infrastructure

2.1.12.1 Status of the Sector in the District

Growing awareness about health and environmental issues is paving the way for increasing demand for organically produced agri products. This is making organic farming a growing business. Further, plant tissue culture has in recent years, become of major industrial importance in the area of plant propagation and disease prevention. The micro propagation technology has a vast potential to produce plants of superior quality. Tissue culture raised plants are vigorous and fast growing than conventional plants. They yield better results as they are produced under ideal environment from selected mother plants.

2.1.12.2Infrastructure and linkage support available, planned and gaps

Department of Agriculture provides technical guidance for making vermicompost. Vermicompost units are sanctioned by Agriculture department. There is no unit providing training under bio-fertilizers or pesticides. There is no scientific management of gau-mutra, which has tremendous soil enriching potential. Neem based bio-pesticides needs to be promoted. Promotion and livelihood options for organically grown medicinal and aromatic plants. Establishment of quality control laboratory and certification knowledge and to bring technological awareness of the farmer.

2.1.13 Land Development, Soil Conservation and Watershed Development

2.1.13.1 Status of the Sector in the District

Activities related to land conservation and watershed development directly or indirectly increase agricultural productivity. In order to enhance land productivity several projects have been completed in the district in recent years under NABARDs. The district has 54663 ha of other uncultivated land and culturable wasteland, which is 21 % of the total area, and this land can be utilized for agriculture purpose through Land Development.

2.1.13.2Infrastructure and linkage support available, planned and gaps

NABARD is implementing 01 watersheds (1000 ha) in Dhalyote village of Kalakote Block in the district. Department of soil conservation and engineering provides technical guidance for land leveling/ scrapping. There is need to develop effective coordination with banks and farmers. Specific demonstration/ extension efforts need to be made to educate the borrowers about the utility of scheme. The development generally involves use of farm machinery and own labour of farmers. NABARD is implementing one TDF project in Planger block also. Both the NRM projects are aimed towards soil conversation through community mobilization.

2.1.14 Agri. Infrastructure - Others

2.1.14.1 Status of the Sector in the District

Agriculture infrastructure mainly includes a wide range of public services that facilitates production procurement processing storage and trade. In the district there are possibilities of bank loans in this sector but the demand is not high. One major reason for the lack of demand is the lack of awareness. However, in recent years there has been an increasing trend among farmers towards the use of vermicompost, Seed production unit, bi pesticides/fertilizers etc.

2.1.14.2 Infrastructure and linkage support available, planned and gaps

Under the CSS for Promotion of 10000 FPOs, the FPO have been provided with necessary seeds and fertilisers licenses which will increase the availability of quality seeds to farmers and various other inputs. Emphasis is being laid on to involve FPOs functioning in the district as traders & commission agents for various agriculture activities.

2.1.15 Agriculture – Ancillary Activities

Food & Agro Processing

2.1.15.1 Status of the Sector in the District

The district has a number of products like maize, walnut, apple, etc., that may be taken up for further processing. The district has good number of women SHGs, especially under NRLM (UMEED in J&K), which are already engaged in agro processing activity on a small scale, that may be further taken up with the help of PM Formalization of Micro Enterprises Scheme launched by GoI. The Department of Horticulture, Planning & Marketing is the nodal department in the scheme in the districts.

Support for Primary processing centers is available under Agriculture Infrastructure Fund. All loans under the financing facility will have interest subvention of 3% per annum up to limit of Rs.2 crore. This interest subvention will be available for a maximum period of seven years. Eligible entities are Primary Agricultural Cooperative Societies (PACS), Farmers Producer Organizations (FPOs), Marketing Cooperative Societies, Agriculture entrepreneurs, Start-ups, Farmers, SHGs, JLGs etc. Further, there are schemes for primary processing of fruits and vegetables from the National Horticulture Board (NHB) under which credit linked subsidy@50% (hilly and scheduled areas) of the project cost limited to Rs.72.50 lakh per project. Incentives under post integrated harvest management are also available under Capex budget of the J&K UT Govt. and other Central Sector Schemes.

2.1.15.2 Infrastructure and linkage support available, planned and gaps

Availability of infrastructure is almost lacking. There is no Cold Storage and pack house unit in the district. The progress under schemes of Government of India, APEDA, NABARD and NHB, under food and agro processing is negligible. There is good scope for linkage between corporate houses and farmers for post-harvest agro/food processing. The local traders as also traders from Jammu market, purchase fruits from farmers directly and transport them to Jammu and other markets in the country.

Rural godowns, cold storage and uninterrupted power supply need to be ensured; Efforts should be made to develop skilled manpower and entrepreneurship in the district; Adequate cleaning, sorting and grading facilities need to be created in the district.

2.1.16 Agri. Ancillary Activities – Others

2.1.16.1 Status of the Sector in the District

Agri-clinics/ Agri-business centers have been identified as an emerging activity in activity for financing. With the diversification and innovation of agricultural activities, the need for support and extension services is also increasing year by year.

2.1.16.2 Infrastructure and linkage support available, planned and gaps

The need for diversification of agricultural activities as well as support and extension services is increasing year by year in the district. In this direction it is important that agricultural graduates or graduates of allied subjects (like horticulture animal husbandry veterinary forestry dairy poultry fisheries etc.) set up agricultural clinics and agri-business centers. Under the scheme all banks will provide loan facilities up to Rs.20.00 lakhs to individual entrepreneurs or up to Rs.1 crore to groups of 5 entrepreneurs (of which one should be a graduate. In Business Development and Management) on attractive terms. Refinance facilities are also available from NABARD for banks. Under this scheme the Government of India provides subsidy of 36 to genera category beneficiaries and 44 to SC/ST category beneficiaries through NABARD.

Credit potential for MSMEs

3. Credit potential for MSMEs

3.1.1.1 Status of the Sector in the District

The development of Industrial sector is a key for providing employment opportunities to the UT of Jammu and Kashmir's unemployed population. The UT of Jammu and Kashmir has strived to accelerate the process of industrial development and has made substantial progress during the last few decades.

The Government of India has notified the new Central Sector Scheme for Industrial Development of UT of Jammu and Kashmir on 19.02.2021 to attract capital investments in J&K. The Scheme provides four types of incentives namely i) Capital Investment ii) Capital Interest Subvention iii) Goods and Services tax linked Incentive and iv) Working Capital Interest Subvention. In order to boost Industrial Development in UT, the Government of J&K has also notified the J&K Industrial Policy, J&K Private Industrial Estate Development Policy and J&K Industrial Land Allotment Policy. Moreover, UT of J&K is striving to achieve the objectives of Trade & Export policy (2018-28) such as, to enhance domestic trade volume, to encourage, promote & facilitate more investment in enterprises, to provide employment opportunities to the educated unemployed & skilled youth in the field of trade & commerce and to create new markets and ancillary facilities through regional development plans.

3.1.1.2 Infrastructure and linkage support available, planned and gaps

The total udyam registration in the district as on date stands at 11974 micro-11861, small-111 and medium-2) J&K Bank has been operating a Rural Self Employment Training Institute (RSETI) in the district for the last 15 years. There are two industrial estates in Rajouri district one at Rajouri and other at Sunderbani. There are 23 Handicraft Training Centres and 5 Handloom Training Centres. Support services are also available from DIC, Handicraft Department, Handloom Department, and KVIB. Training Institutes, like Industrial Training Institutes are existing in the district. Educated unemployed rural youth as well as members of self-help groups especially women members are provided free training in various employment-oriented activities and assisted in obtaining bank loans. NABARD also sponsors training programs. Schemes like Stand up India PM Mudra yojna Start up India Pradhan Mantri Employment Generation Programme One District One Product (ODOP) and Vishwakarma Shram Samman Yojana are helping entrepreneurs to set up their units in district.

Credit Potential for Export Credit, Education & Housing

4.1 Credit Potential for Export Credit

4.1.1.1 Status of the Sector in the District

Classification of exports under priority sector: Export credit includes pre-shipment and post-shipment export credit. As per the RBI Classification, export credit includes loans with sanctioned limits upto 40 Crore per borrower. Export credit under agriculture and MSME sectors are allowed to be classified as PSL in the respective categories viz. agriculture and MSME. Export Credit (other than in agriculture and MSME) will be allowed to be classified as priority sector. Lending by banks for export purposes is an eligible item under priority sector definitions of RBI. This is in turn financed either through Indian Rupee or through foreign currency. The items financed for export varies from a host of manufactured items through the micro, small, medium and large enterprises, a variety of agro processed products, as well as services rendered through IT industries.

4.1.1.2 Infrastructure and linkage support available, planned and gaps

There is considerable scope for increasing the horticulture produce, which is exported. The UT government has an industrial policy that offers attractive incentives along with a single-window clearance mechanism.

4.2 Credit Potential for Education

4.2.1.1 Status of the Sector in the District

The purpose of education is to enable creative self-expression through physical mental aesthetic and moral development which contributes not only to individual growth but also to the development of the economy. The literacy rate in the district is 68.17 percent with the female literacy rate at 56.5 percent and the male literacy rate at 78.13 percent. The district has 905 primary schools, 549 upper primary schools, 116 secondary schools 12 colleges and 01 Government Medical College.

4.2.1.2 Infrastructure and linkage support available, planned and gaps

Baba Ghulam Shah Badshah University is a significant institution cum engineering college in Rajouri, which is providing various undergraduate and postgraduate programs. Under Priority Sector Lending loans and advances granted to individuals for educational purposes include loans up to Rs.10 lakh for study in India and Rs.20 lakh for pursuing professional courses abroad.

4.3 Credit Potential for Housing

4.3.1.1 Status of the Sector in the District

Housing is one of the necessities for human security and advancement. At the same time as a driver of demand in various sectors of the economy the housing sector has played a significant role. This sector can be considered an engine of economic growth as it has strong backward and forward linkages in the industry.

4.3.1.2 Infrastructure and linkage support available, planned and gaps

Affordable housing to the poor with target of constructing 20 million affordable housed by March 31 2024. It has two components: PMAY(Urban) for urban poor and PMAY (Gramin) for rural poor. Now the scheme has been extended by GoI under which 3 crore more houses shall be built. So far, a total of 29204 houses were constructed in the district under PMAY-G and PMAY-U.

Credit Potential for Infrastructure

5.1 Infrastructure - Public investments

5.1.1.1 Status of the Infrastructure in the District

Infrastructure development has a key role to play in both economic growth and poverty reduction. Rural infrastructure today comprises of core infrastructure viz. Irrigation, connectivity (road, power, IT), transportation, energy (generation, transmission, distribution), post-harvest storage and social infrastructure viz., drinking water, sanitation, sewerage, health, housing and education.

The Indian farmer has suffered not only due to restriction on marketing and processing, but also due to poor infrastructure. The greatest challenge lies in reducing the transaction costs for farmers by providing them access to world-class physical infrastructure. RIDF has emerged as NABARDs major partnership with state governments for the creation of a wide variety of rural infrastructure covering 39 activities, under three broad categories, viz, agriculture and related sectors, rural connectivity and social sectors. A comprehensive value chain model covering innovations in farming, transportation, storage, processing, value addition and marketing can help farmers earn profit in a sustainable manner.

NABARD as the apex level development bank, has been putting efforts for building infrastructure and other promotional activities for the development of agriculture, allied and rural non-farm sector activities in the rural areas of the country. Special funds like Rural Infrastructure Development Fund (RIDF) and NABARD Infrastructure Development Assistance (NIDA) are deployed for the development of infrastructure in rural areas.

5.1.1.2 Infrastructure and linkage support available, planned and gaps

There is a need for more creation of infrastructure like flood protection measures irrigation roads bridges culverts and agricultural facilities specially allied activities.

5.2 Benefits of RIDF Projects (except irrigation, rural roads and bridges)

With the development of connectivity routes in rural areas diversification of agricultural areas became possible due to the introduction of new economic activities and new technologies in villages. A large number of agro-based units are being established in remote villages of the district. Rural people have been facilitated in transporting their produce to markets and mandis. Farmers received information about modern farming practices through farmer clubs formed by them and due to easy transportation costs were reduced and villages were directly connected to cities and development centers. Through integrated watershed development soil erosion in villages has been controlled and water management has enabled the cultivation of higher-yielding crops increasing land productivity and converting barren and uncultivated land into productive land. The modernization of small tube wells has increased the area under irrigation in rural areas.

5.3 Social Infrastructure involving Bank Credit

5.3.1.1 Status of the Sector in the District

Though all types of infrastructure development are aimed at improving the standard of living of the people, there are certain types of investment which have a direct bearing on the social lives of the people, especially in the rural areas. Investments in schools, health centres, drinking water and sanitation facilities are examples of some such sectors, which can be termed as Social

Infrastructure. Though investments for this sector has been the prerogative of the Government, the gap between the demand and supply of this infrastructure requirement has been widening over the years. The recent changes in the priority sector guidelines by the RBI, has encouraged private participation through bank credit for this sector. This chapter attempts to make an estimate of the potential under social infrastructure sector that can be financed through bank credit.

5.3.1.2 Infrastructure and linkage support available, planned and gaps

Adequate means of transportation are not available in rural areas causing difficulties for rural residents. This is an area where government efforts alone will not suffice and development through the PPP model is necessary. The government should arrange for public awareness on crucial issues such as health and education. Efforts should be made to increase women participation. Full advantage should be taken of various government schemes like Pradhan Mantri Awas Yojana Swachh Bharat Abhiyan and Sarva Shiksha Abhiyan. Efforts should be made to fully implement the Prime Ministers Swachh Bharat Mission.

5.4 Renewable Energy

5.4.1.1 Status of the Sector in the District

The district has a total of 385 villages all of which are electrified although the power supply situation is extremely poor. Solar lights have been identified as an emerging activity in the district. Banks are also emphasizing lending for this activity as an alternative to electricity.

5.4.1.2 Infrastructure and linkage support available, planned and gaps

GOI has announced Capital Subsidy cum Refinance Scheme for installation of solar off-grid (Photo Voltaic and Thermal) and decentralized applications under the National Solar Mission. The target of Grid Connected Solar Power Projects has been revised from 20,000 MW to 100,000 MW. The availability of huge quantity of wheat stubble and paddy husk, other agriculture wastes, by-product of industries and household waste provides good scope for generating biomass energy. Limited budget for providing subsidy to create a meaningful impact for the development of this activity. Awareness regarding generation and benefits of solar, biomass, biogas, wind energy has not yet been percolated down and needs to be widely propagated by the (J&KEDA) and Indian Renewable Energy Development Agency (IREDA).

5.5 RIDF

5.5.1.1 Details of RIDF projects sanctioned in the district are given below:

(Rs. crore)

Sr. No.	Tranche	No. of projects	Fin. Outlay	RIDF Loan
A	Closed Tranches	217	365.848700	328.7561
В	Ongoing tranches	124	509.270000	509.2795
	Total (A + B)	341	875.118700	838.0356

5.5.1.2 The sector-wise details of RIDF projects sanctioned in the district various categories are as given below:

(Rs. crore)

Sr. No.	Sector	Projects sanctioned (No.)	Fin. Outlay	RIDF loan
A	Irrigation/ Agriculture	17	6.663900	5.7807
В	Rural roads & bridges	248	762.332000	684.2706
С	Social Sector	62	91.455300	81.2046
	Total (A + B + C)	327	860.451200	771.2559

5.6 Some of the benefits accrued from the projects sanctioned under RIDF in the district are as under:

Sr. No.	Sector	Projects sanctioned (No.)	Likely benefit	Unit	Value
A	Irrigation	17	Irrigation potential	ha	236
В	Rural roads	225	Road length	km	943
С	Bridges	23	Bridge Length	m	831

5.6.1.1 Details in respect of other RIDF projects are given below.

Sr. No.		Projects sanctioned (No.)	Unit	Value
1	Rural Market Yard	1	No.	О
2	Animal Husbandry	12	Sq.m	1207
3	Farmer Training Institute	1	Sq.m	1850

Informal Credit Delivery System

6.1 Status of the Sector in the District

The SHG movement in Rajouri has been instrumental in enabling women to enhance their skills, access financial resources, and build social networks that support entrepreneurship. Women participating in SHGs have reported improvements in their confidence and financial literacy, which have allowed them to create independent sources of income. This shift not only aids in poverty alleviation but also contributes to changing the traditional gender dynamics in rural areas. To give a push to the SHG movement National Rural Livelihood Mission (NRLM) was launched in Rajouri district. As on 31 March 2023, more than 5000 SHGs have been formed of which more than 2000 are credit linked under NRLM. The activities which are grouped under 'Others' includes loans to individuals and their SHGs/JLGs, loans to distressed persons to prepay non-institutional lenders and loans under other sectors of the economy.

6.2 Infrastructure and linkage support available, planned and gaps

NRLM working in all 19 blocks of district. Lack of awareness among public especially lower strata of society about the availability of Overdraft/consumption/SHG, JLG facilities from banks. A consensus may be arrived at by banks to reduce the gap in number of SHGs who have opened Saving Bank Accounts with banks and are yet to be credit linked. Though, during the last two decades the SHG movement has grown from strength to strength, there are certain traits that does cause some worry. From aggressive lending to SHGs, banks are nowadays very cautious basically on account of instances of loan delinquency.

Critical Interventions Required for Creating a Definitive Impact

7.1 Farm Credit

- More centres for input distribution under cooperative fold
- Banks should provide credit to landless cultivators, sharecroppers, tenants and small/marginal farmers through Joint Liability Groups.
- Increase use of fertilizers and farm Mechanisation, and enroll more farmers in DBT schemes.
- Preparation of Kisan Credit Card for more and more farmers & 100 percent implementation of Pradhan Mantri Fasal Bima Yojana
- Atma Nirbhar Bharat Abhiyan, Pradhan Mantri Kisan Yojana, KCC Saturation Campaign, will promote the use of drones in agriculture Financial assistance under the Sub-Mission on Agricultural Mechanization, Internet of Things (IoT) applications in agriculture, etc. can be promoted and used to increase the agriculture sector. Image: Internet of Things
- Banks should provide loans to landless cultivators, sharecroppers and tenant farmers and small and marginal farmers through joint liability group.
- In order to make the custom hiring system successful, Government Farm Equipment Center should be established at the village level with the help of the Panchayati Raj Department.

7.2 Water Resources

- Implementing rainwater harvesting systems and promoting water-efficient irrigation methods, such as drip or sprinkler irrigation, can significantly reduce water wastage and improve water use efficiency in agriculture. Educational programs can help farmers adopt these practices.
- Enhancing the capacity of local government and institutions responsible for water management is crucial. This includes training personnel in modern water management techniques and creating efficient administrative frameworks to oversee water distribution and usage.
- Establishing a robust data collection and monitoring system is essential for informed decision-making. Regular assessment of water resources, usage patterns, and the impacts of climate change on water availability will help in planning and implementing effective water management strategies.
- Increasing awareness about the importance of water conservation and management among local communities can lead to more responsible water use. Educational campaigns can focus on the benefits of sustainable practices and the impact of water scarcity.
- Establishing protective measures for the catchment areas around springs can prevent soil erosion, reduce pollution, and maintain the hydrological balance. Afforestation and reforestation efforts can help stabilize the soil and enhance groundwater recharge.

• Establishment of infrastructure, such as the construction of canals, water storage tanks, and check dams, are essential for enhancing irrigation facilities. The development of these structures helps in capturing rainwater and ensuring a more reliable water supply during dry spells.

7.3 Farm Mechanization

- Popularising use of small implements like power tillers etc. among small and marginal farmers.
- Setting up of Custom Hiring Centres
- Maintenance and upkeep of machinery and skill training for same.

7.4 Plantation and Horticulture

- Preparation of bankable models and training of bankers
- Setting up of processing units under PMFME
- Creation of Farm Gate Infrastructure under AIF
- Setting up export related infrastructure in vegetable growing belt
- Encouraging marginal and small farmers to move towards cash crops

7.5 Forestry/ Waste Land Development

- Popularisation of hi-tech plantation on commercial scale and bankable model
- Promotion of Bamboo plantation

7.6 Forestry/ Waste Land Development

- Popularisation of hi-tech plantation on commercial scale and bankable model
- Promotion of Bamboo plantation

7.7 Animal Husbandry – Dairy

- Easy credit facility to farmers
- Insurance of cattles/buffaloes
- Developing milk route in the block for better milk collection and value addition
- Promotion of Selective breeding through Artificial Insemination (AI)

7.8 Animal Husbandry – Poultry

- Easy credit facility to farmers
- Insurance to the units

• Setting up poultry feed units on commercial scale

7.9 Animal Husbandry – Sheep, Goat, Piggery

- Easy credit facility to farmers
- Insurance
- Capacity building by KVK
- Market Linkage

7.10 Fisheries

- Easy credit facility to farmers
- Insurance
- Building public demonstrations of advanced fish culture techniques such as integrated fish farming, biofloc etc.

7.11 Construction of Storage and Marketing Infrastructure

- Accreditation of warehouses and godowns through WDRA
- Popularizing NWR

7.12 Land Development, Soil Conservation and Watershed Development

- Setting up of soil testing lab and treating soil accordingly
- Bank finance for land treatment/ development activities

7.13 Agriculture Infrastructure: Others

 Awareness creation among bankers and farmers for adoption of NADEP and Vermicompost

7.14 Food and Agro. Processing

- Increased financing under PMFME
- Setting up infrastructure for export promotion and linking ancillary units with it

7.15 Agri. Ancillary Activities: Others

- Providing ACABC training to Agriculture Graduates
- Setting up ACABC/Agri junctions
- Capacity building of FPOs for availing credit from financial institutions

7.16 Micro, Small and Medium Enterprises (MSME)

Awareness among entrepreneurs about CGTMSE and schemes of Government

- Finance to entrepreneurs by Banks with facility of CGTMSE
- The District Industries Center should arrange for effective entrepreneurship training programs and establish product-cum training centers.
- Currently, the MSME sector is perceived to be associated with low quality standards in public perception. Efforts should be made to upgrade the MSME sector through modern and new techniques to achieve global quality standards.

7.17 Export Credit

- Setting up of export infrastructure in vegetable and plantation growing areas
- · Promoting ancillary units for agro processing
- Easy availability of export credit
- Training by APEDA for legal formalities

7.18 Education

Banks to extend credit as per Priority sector norms

7.19 Housing

• Growing urbanisation in blocks of Lamberi, Nowshera, Manjakote and Sunderbani requires bank credit for housing.

7.20 Social Infrastructure

- Setting up RO plants at all Blocks
- Creation of Sanitary infrastructure in all markets on use and pay basis

7.21 Renewable Energy

- Solarisation of Government tubewells
- Creation of infrastructure for Net Metering/energy evacuation to increase financing under PM Surya Ghar Bijali Yojana for solar roof top plants

7.22 Informal Credit Delivery System

- Skill training to SHG members for setting up Enterprise
- Linking SHGs/enterprises with market through ONDC etc.
- Easy credit facility from banks

Status and prospects of Cooperatives

8.1 Background

A cooperative is defined as 'an autonomous association of persons united voluntarily to meet their common social, economic and cultural needs as well as their aspirations through a jointly owned and democratically controlled enterprise'.

Cooperatives are governed by seven major principles, i.e. voluntary and open membership; principle of democratic member control; principle of member economic participation; principle of autonomy and independence; principle of education, training and information; principle of cooperation and, principle of concern for community. Cooperative enterprises help their members to collectively solve shared socio-economic problems. Cooperatives strengthen bargaining powers of their members, help them get access to competitive markets and to capitalize on new market opportunities. As such, they improve income opportunities, reduce costs and manage risks of the members.

8.2 Formation of Ministry of Cooperation by GoI

The GoI has set up a separate Ministry for Cooperation on 06 July 2021 which will provide a separate administrative legal and policy framework for strengthening the cooperative movement in the country, to help deepen the presence of cooperatives, to streamline processes for 'Ease of doing business' for co-operatives and enable development of Multi-State Co-operatives (MSCS). In the words of the Hon'ble Prime Minister, "The Cooperative movement is such a model which can provide a successful alternative to socialism and capitalism".

8.3 Latest initiatives by Ministry of Cooperation (MoC), GoI

- The MoC has, in consultation, coordination and partnership with state governments, NABARD, national level federations, training establishments at state and national level and other stakeholders is working on the following initiatives.
- Computerization of Primary Agriculture Cooperative Societies: This scheme aims at computerization of 63000 functional PACS leading to increase in efficiency, profitability, transparency and accountability in the working of PACS.
- Co-operative Education Setting up of World's largest Cooperative University: This aims at introduction of cooperative education as a course curriculum and also as independent degree/diploma courses in Schools and Universities. This will also take care of research in the field of cooperation.
- World's largest Cooperative Training Scheme: This aims at revamping strengthening existing cooperative training structure in the country and modernize the training methods through a revamped scheme.
- To provide facilities at par with FPOs to existing PACS.
- Establishing Multipurpose PACS/Dairy/Fisheries cooperatives in every panchayat.
- World's largest food grain storage scheme for cooperatives.
- Revival and computerization of PCARDBs/SCARDBs.
- Establishment of National Cooperative Database.

- Amendment to Multi State Coop. Act 2002 and setting up of 3 new MSCS.
- New Cooperative Policy Drafting of new Cooperative policy with a view to strengthen the cooperatives and make them vibrant with increased contribution to the economy.
- All these initiatives will create immense business potential from grassroots upward in times to come.

8.4 Recent developments/ latest initiatives by State Government in strengthening the outreach and activities of cooperatives

- The cooperative sector in Jammu and Kashmir comprises a total of 9794 cooperatives, covering about 8874 Non-Credit Cooperative Societies (like Milk/Fishery/Poultry/Housing/Labour/Consumer/Weavers/Marketing/Industrial societies, etc.) and 920 rural credit co-operatives (PACS, LAMPs, FSS, etc.). These primary societies have nearly 892841 lakh members spread across 6850 villages. Likewise, long-term rural cooperative credit institutions include one State Co-operative Agriculture and Rural Development Banks (SCARDB), which has a unitary structure with 51 branches. It has a membership of nearly 0.99 lakh members. Further, there is one MSCS having their registered office in the state. Besides, there are about 59 district level federations, 3 state level federations operating in the state. (Source: National Cooperative Database (NCD) of MoC, GoI).
- The State Government has undertaken several recent initiatives to enhance the outreach and activities of cooperatives, reflecting a commitment to fostering economic growth and community engagement. These initiatives aim to empower local communities, improve service delivery, and promote sustainable development through cooperative models.
- The Dairy Development Scheme, approved by the J&K Government, aims to enhance the regions dairy sector through a structured funding framework. NCDC provides a 70% loan to the J&K Government, which offers a 50% loan to cooperative societies, along with a 25% Central Government subsidy and a 5% owners contribution. The UT Government allocates 20% of the loan as share capital. With an eight-year repayment plan, this initiative supports local farmers, improves milk production quality, and promotes sustainable practices, ultimately fostering economic development in Jammu and Kashmir.
- The Ayushman Sahakar scheme enhances healthcare services through cooperatives in Jammu and Kashmir. By providing financial assistance for healthcare needs, it improves access to quality services, particularly in underserved areas. The scheme offers favorable interest rates for women-led societies, promoting gender equity in healthcare management. It aligns with the National Digital Health Missions goals of improving health infrastructure and personnel training. By leveraging the cooperative model, Ayushman Sahakar fosters community participation, emphasizing preventive care and education, and creating sustainable health systems that empower communities for long-term health benefits.
- The initiative to establish 80 food processing units in Jammu and Kashmir aims for equitable agricultural development, ensuring four units per district by March 2025. Targeting cooperatives with a turnover of Rs 75 lakhs or less, it enhances local food production and processing. Local authorities will aid in preparing Detailed Project Reports (DPRs), which will undergo technical evaluation. Cooperative Banks will provide up to 90% of project costs, capped at Rs.9 lakhs, with manageable repayment terms. This initiative boosts local economies, creates jobs, and reduces post-harvest

losses, contributing to food security and improved livelihoods.

8.5 Status of Cooperatives in the District

- There are more than 160 registered cooperative societies in the district, of which 49 are credit societies (PACS) and remaining are non-credit societies. Majority of the societies are registered as Dairy Societies.
- Dairy cooperatives are a growing segment in Rajouri with a total number of 38. They
 assist local dairy farmers by providing resources for animal health, feed supply, and
 improved livestock management practices. These cooperatives also facilitate the
 marketing and sale of milk and dairy products, which ensures fair pricing and a steady
 income for dairy farmers.
- Rajouri has a rich tradition of handicrafts, and cooperatives in this sector support
 artisans by providing training, resources, and marketing opportunities. These
 cooperatives help artisans access a broader market for their products, which in turn
 contributes to preserving local crafts and generating income. There are like 4 to 5
 cooperatives registered with Handloom and Handicraft.

8.6 Potential for formation of cooperatives

- There is fair potential for cooperative activity in the Agriculture & Allied sector in the district.
- The distribution is uniform in that all blocks are covered by some society or the other.
- Further, there is potential for creation of cooperative societies in Dairy Sector in all blocks of the district. This can have immense multiplier effect in giving a fillip to economic activities in these areas.

NABARD's Projects and Interventions in the District						
S. No.	Broad Area	Name of Project/ Activity	Project Area	Nature of Support Provided	No. of Beneficiaries	Likely Outcome/ Impact
	Collectivisation		DI I	Mobilization	More than 400 members have been registered	 Formation & promotion of FPOs is the first step for converting Krishi into Atmanirbhar Krishi.
				 Preparation and implementation of business plan 		■ Easy availability of raw material
1		on o4 number FPOs sanctioned under CSS Blocks (Sunderbani, Nowshera, Qila Darhal & Budhal)	(Sunderbani, Nowshera,	(Sunderbani, Nowshera, upgradation and capacity building		 Training capacity buildings, learning of new designs
			 Establishment of credit linkage support 	with the FPO.	 New marketing avenues to small and marginal farmers. 	
		being implemented through NABARD		Networking with various stake holders		 This will enhance cost effective production and productivity and higher net incomes to the member of the FPO.
2	Watershed Development	Development Development Dhalyote of	- Field Booding (FP)	The project is expected to benefit more than 1000 beneficionies and	• The natural water seepage capacity has improved and the water table in the project area has increased.	
		(CBP)	Block Kalakote	• Field Bunding (FB)	beneficiaries and shall be promoted to FIP.	Rainy drains, which used to dry up by Feb are seeing water in them till April.

		 Training and Capacity Building Livelihood and women Development Drainage Line Treatment Employment 		 Construction of these loose boulder structures, most of the water used to flow. The water is being accumulated in the fields and drains of the farmers and is maintaining the moisture. With this scheme, the people of the village will get work in the village itself, this year most of the people worked as labourers while staying in their own village.
Talain Watershed (YMC)	Block Plangarh	generation • 05 number villages covered	200 tribal families benefitted and 200 wadis were established.	 Livelihood development through development of wadi comprising of Horticulture plant forestry plants and intercropping. Increase in beneficiary income visa-a-vis pre development position Reduction in the extent of migration in terms of number of families migrating, number of migration days, etc. Wage employment generated in terms of person days and value of employment created. Development of institutions, their participation in planning and executing the work, envisaged improvement in their managerial, technical, bookkeeping and fund management capabilities.

Success Stories

Success Story 1: Tribal Development Project in Planger Block of District Rajouri

Scheme TDF-FSDD

Project Implementing Agency Yusuf Meherally Centre

Duration of the project Five Years

No. of beneficiaries 220

State Jammu and Kashmir

District Rajouri

Block Planger

Support provided: An amount of Rs.131.49 lakh was sanctioned as grant assistance under NABARD's TDF fund. This grant covers the Horticultural and Agricultural Development aspects, Micro Enterprises for Landless and Women, Training, Capacity Building, Women Development and other natural resource management measures.

Pre-implementation status

- The project is implemented in the remote area of Rajouri District wherein people were not aware about the natural resource management.
- The socio economic status of the people living in the targeted villages was low and the villagers were relying on subsistence farming and livestock rearing with limited access to alternate livelihoods or markets.
- The farmers were mostly engaged in cultivation of traditional crops like maize and wheat or fodder. NABARD has been successful in shifting the farmers to horticulture crops like walnut, Apple and Pears

Challenges faced

- Tribal communities often lack awareness about government schemes and project benefits, leading to low participation.
- Shortages of essential resources like water, land, and sustainable livelihoods create hurdles in project implementation.
- Lack of trained personnel to implement and monitor projects effectively in remote tribal areas.
- Tribes resisted changes due to their traditional lifestyles and reluctance to adopt new practices or technologies promoted through the project.
- Challenges in coordination between various stakeholders, such as local government, NGOs, and community groups, can lead to delays and inefficiencies in project execution.
- The plants selected for the wadis have longer fruiting period. However, it is expected that the plants shall bear fruits within next few months.

Impact

- Around 17,000 horticulture plants which mainly include Walnut, Apricot, Pear etc. have been distributed to these families for establishment of wadis.
- All projects components including Horticulture, soil conservation, water resource development, landless activities, health, capacity building and women empowerment has been completed.
- Sheep and goat rearing units (5 each) have been provided to landless beneficiaries. This helped the beneficiaries in generating livelihood.
- The natural resource management helped in reducing soil erosion.
- Formation of jal kunds and farm ponds also ensured that the villages are not facing water scarcity during the intense summer spells.

Success Story 2: Farmer Producer Organization under CSS-10,000 at Sunderbani Block of District Rajouri

Scheme

Project Implementing Agency

Duration of the project

No. of beneficiaries

State

District

Block

Central Sector Scheme for 10,000 FPOs

Yusuf Meherally Centre

Three Years

150 and counting

Jammu and Kashmir

Rajouri

Sunderbani

Support provided:

- An amount of Rs. 18.00 lakh as grant assistance was sanctioned to the FPO under New Central Sector Scheme for Formation and Promotion of 10000 FPOs.
- This grant is allocated for the registration of the FPO, the appointment of a CEO and accountant to manage its affairs, the purchase of minor equipment, office rent, electricity charges, and other operational expenses.
- Additionally, an amount of Rs. 25.00 lakh was sanctioned to the CBBO Yusuf Meherally Centre, for supporting the FPO. The major components include training for the Board of Directors and the CEO of the FPO, as well as exposure visits for FPO members.

Pre-implementation status

- The farmers lacked the necessary skills and training for effective lavender cultivation, leading to suboptimal growth and low yields. The farmers were not aware of the best practices being followed in the farming and due to which the farmers were dependent only in seasonal crops.
- Processing challenges were prevalent due to a lack of local facilities and equipment. Without proper distillation units or processing infrastructure, farmers struggled to convert lavender into high-value products, limiting their income potential.

Challenges faced

- The Farmers in the Sunderbani block faced significant challenges in accessing quality
 planting materials for lavender cultivation. Limited local sources, high costs, and a lack
 of knowledge about suitable varieties restricted their ability to invest in better options.
- Farmers in the region primarily grew traditional crops like maize and wheat, which yielded low financial returns. These crops often served only subsistence needs, leaving little surplus to invest in better agricultural practices or new ventures, such as lavender cultivation.
- The farmers' scattered nature and lack of sense of organization made it difficult for them to access larger markets. Many relied on informal sales channels, which often resulted in lower prices and less stability.

Impact

- The FPO has significantly increased farmers' income by enabling a shift from low-profit traditional crops to perennial cultivation, complemented by improved access to quality planting materials and technical support, which enhanced crop yields.
- Training programs provided by the FPO has equipped farmers with essential skills for both cultivation and processing that increased their efficiency and product quality.
- The formation of the FPO has made the department to impart special focus on nurturing of this FPO. The chairman of the FPO has availed a benefit under the UT Govt. scheme of HADP wherein a Polyhouse of 500 sqm has been established and 90% subside is granted to the beneficiary. The pictures enclosed above are self-explanatory.
- One of the BODs of the FPO has been able to avail the benefit under PMFME scheme of Govt. of India. A loan of approx. Rs. 7 lakh has been provided to the beneficiary with a subsidy of 35% for upgrading the atta chakki unit being run by the beneficiary. The efficiency of the atta chakki has now been improved with modern machinery and the beneficiary is now earning a handsome amount.

Appendix 1a

Climate Action & Sustainability

1. Climate Action - Scenario at Global & National Level

Climate Change and its Impact

- Climate change is affecting every region on the Earth, in multiple ways. The IPCC AR6 highlights that human-induced climate change is intensifying weather and climate extremes, resulting in unprecedented heatwaves, heavy rainfall, and severe droughts. The frequency and intensity of these events are likely to increase, posing significant risks to ecosystems, biodiversity, and human societies.
- India is exposed to a whole range of climate and weather-related hazards. India with diverse geographical regions, long coastline, biodiversity, and high dependence on natural resources is one of the most vulnerable countries to climate change risks worldwide. Further, more than half of India's population lives in rural areas and depends on agriculture & allied activities, which are highly sensitive to climate change, threatening the livelihoods of people dependent on them.
- There is emerging evidence that the productivity of crops, livestock and fish is likely to be affected with implications to food security, livelihoods, and sustainability in agriculture. In India, several studies have projected declining crop yields, in the absence of adaptation to climate change. As per the district level risk and vulnerability assessment of Indian agriculture to climate change undertaken by ICAR-CRIDA, 109 districts out of 573 rural districts (19% of total districts) are 'very high-risk' districts, while 201 districts are high-risk districts.

2. Climate Finance and Challenges

Climate finance requirement of India is enormous. While the preliminary financial estimates for meeting India's climate change actions as per NDC was USD 2.5 trillion between 2015 and 2030, estimated financial requirement of India to become net-zero by 2070 as per IFC is US\$10.1 trillion. There are various estimates of financial requirements that vary greatly due to varying levels of detail, but it is important to note that they all point to a need for tens of trillions of US dollars. India's updated NDCs also indicates the need to better adapt to climate change by enhancing investments in development programmes in sectors vulnerable to climate change, however financial requirements for adaptation are very large and will increase in the future. To fully meet our NDCs in a timely manner, India requires enhanced new and additional financial, technological and capacity building support. However, financial, and technological commitments by developed countries under the Paris Agreement are yet to be fully transpired.

3. Initiatives of Govt. of India

India initiated the National Action Plan on Climate Change (NAPCC) in 2008, which introduced eight National Missions encompassing various efforts. In August 2022, the Government of India displayed greater determination in its efforts to address climate change by submitting its revised Nationally Determined Contribution (NDC) to the UNFCCC. Through Mission LiFE (Lifestyle for the Environment), India advocated for a global shift in mindset and behaviour, moving away from thoughtless and harmful consumption towards purposeful and conscious utilisation.

4. Initiatives of RBI

- Climate change is a rapidly emerging area of policy interest in the RBI. Back in 2007, the RBI advised banks to put in place Board-approved plans of action towards helping the cause of sustainable development. In 2015, the RBI included loans for generation of renewable energy and public utilities run on non-conventional energy as part of its priority sector lending (PSL) policy to incentivise the development of green energy sources.
- RBI has also laid out guidance for voluntary initiatives by regulated entities (REs) on green finance, setting up of green branches and green data centres, encouraging greater use of electronic means of communication instead of paper, and renewable energy sources. In early 2023, the RBI issued sovereign green bonds to mobilise resources for the Government for green infrastructural investments. RBI has also released the framework for mobilising green deposits by REs.
- In February 2024, the RBI has issued draft guidelines on 'Disclosure framework on climate-related financial risks, 2024'. The framework mandates disclosure by REs on four key areas of governance, strategy, risk management and metric and targets, which is a step towards bringing the climate risk assessment, measurement and reporting requirements under mainstream compliance framework for financial sector entities in India.

5. Initiatives of NABARD

- The whole spectrum of NABARD's functions and initiatives focus on the attainment of sustainable development. NABARD's initiatives in the Agriculture, Natural Resources, and Rural Development (ANR) sector have integral components of climate action both mitigation and adaptation, for vulnerable sectors and communities. NABARD has been playing a key role in channelising climate finance to the nation as the Direct Access Entity (DAE) and the National Implementing Entity (NIE) for major climate funds such as the Green Climate Fund (GCF), Adaptation Fund (AF), and National Adaptation Fund for Climate Change (NAFCC). This role enables NABARD to access and deploy climate finance effectively, driving impactful initiatives that address the pressing challenges of climate change in the agricultural sector.
- In a significant stride towards sustainable development, NABARD recently unveiled its Climate Strategy 2030. The strategy is structured around four key pillars: (i) Accelerating Green Lending across sectors, (ii) Playing a broader Market Making Role, (iii) Internal Green Transformation of NABARD, and (iv) Strategic Resource Mobilization. This strategic initiative not only reinforces NABARD's commitment to environmental stewardship but also positions it as a pivotal player in India's transition towards a resilient and sustainable economy.

6. Way Forward

India has significantly high climate finance needs. NABARD is dedicated to playing its part to expand climate financing in India through a range of financial and non-financial initiatives. Our goal is to promote adoption of innovative and new techniques, and paradigm shifts to build climate resilient agro-ecological livelihoods and sustainable agricultural systems, that are resilient to climate change.

Appendix 1b

Climate Action & Sustainability

Climate Change Scenario – At the State Level

State Action Plan for Climate Change

The State Action Plan for Climate Change (SAPCC) primarily aims to strategize initiatives for adaptation and mitigation, focusing on stabilizing emissions, enhancing ecosystem resilience, climate-proofing the livelihood sector, and diversifying dependency on natural resources. To achieve these objectives, the SAPCC identifies several key sectors for targeted action. These include the Sustainable Energy Mission, Enhanced Energy Efficiency, Water Mission, Sustainable Habitat, Sustainable Agriculture, Tourism, Sustainable Himalayan Ecosystem, Health, Disaster Management, Strategic Knowledge Mission, and the Green India Mission. By addressing these areas, the SAPCC seeks to create a comprehensive framework for combating climate change and promoting sustainable development across the state.

Any specific Climate Change initiative in the District by

Govt. of India: The Government of India has launched several climate change initiatives in Jammu and Kashmir to promote sustainable development and resilience. Key actions include the Jammu and Kashmir Climate Action Plan, which covers agriculture, water, and disaster management; afforestation and reforestation programs to boost forest cover; improved water resource management; and disaster resilience measures. The region is also investing in renewable energy projects, sustainable agriculture, and climate-smart infrastructure. Public awareness and collaboration with NGOs and international organizations further support these efforts. The Government of India has launched several climate change initiatives in Jammu and Kashmir to promote sustainable development and resilience.

ICAR Institutions: In the Kashmir and Ladakh regions, the Centre for Climate Change and Mountain Agriculture at SKUAST-K focuses on climate change impacts on crops like apples and walnuts. They work on improving farming practices with resilient technologies and support local farmers in vulnerable districts. Their Vision 2030 includes using advanced models and tools, like AI and GIS, to predict and manage pests and diseases effectively.

State Government: The Jammu and Kashmir government launched the Har Gaon Hariyali program in November 2021 to increase forest and tree cover across two-thirds of the region, aligning with the Green Jammu and Kashmir vision. They plan to promote solar and carbonneutral cities through a phased pilot project, with Jammu, Srinagar, and Katra starting first. For the 2024-25 budget, they announced planting 190 lakh native trees, creating urban ecoparks, and distributing 10 lakh saplings to farmers. Key initiatives also include the Green J&K Drive, Har Gaon Hariyali, and other flagship programs.

NABARD: NABARD has approved several projects to enhance climate resilience in India. A Rs.22.51 crore initiative promotes sustainable agriculture in Jammu and Kashmir, while a Rs.16.8 lakh project automates ice reservoirs in Ladakh. In 2020, NABARD allocated Rs.11.44 lakh for two artificial glaciers in Leh to improve water conservation. Through the Watershed Development Fund (WDF), NABARD supports watershed programs nationwide, offering Rs. 22,000 per hectare for plains and Rs.25000 for hilly areas to boost soil fertility and crop productivity. The WDF, funded with Rs.200 crore, supports 10 projects in J&K and Ladakh, alongside a Rs.50 crore Tribal Development Fund for 5 additional projects.

Other Agencies: The Government of India has launched several climate change initiatives in Jammu and Kashmir to promote sustainable development and resilience. Key actions include the Jammu and Kashmir Climate Action Plan, which covers agriculture, water, and

disaster management; afforestation and reforestation programs to boost forest cover; improved water resource management; and disaster resilience measures. The region is also investing in renewable energy projects, sustainable agriculture, and climate- smart infrastructure. Public awareness and collaboration with NGOs and international organizations further support these efforts. The Government of India has launched several climate change initiatives in Jammu and Kashmir to promote sustainable development and resilience.

Appendix 1c

Climate Action & Sustainability

Climate Change Scenario - At the District Level

Prospects of Climate Action in the District

- Rajouri District in the UT of Jammu and Kashmir represents an impoverished and climate change—vulnerable region. Under National Innovations in Climate Resilient Agriculture (NICRA) Rajouri District has been named as one of the Districts with high vulnerability to climate change. The district's exposure to erratic weather patterns including droughts excessive rainfall and landslides poses significant risks to agriculture water resources and local livelihoods. Rajouri's high dependency on rainfall water scarcity due to erratic precipitation patterns and reduced winter snowfall poses a major challenge. Certain adaptive strategies can be implemented for overcoming the climate change through adoption of techniques like rainwater harvesting creating community-based water harvesting structures including check dams and storage ponds to ensure irrigation and household water supply during dry seasons. Use of micro irrigation techniques may also be adopted. Livestock is an integral part of agriculture in the UT.
- The population of livestock is quiet high in Rajouri district of the UT. The fodder production and its availability is a pressing problem in the UT. Drought-resistant and high-nutrient fodder varieties can withstand changing climates improve land productivity and reduce resource use. Moreover, introducing crop varieties adapted to drought and shorter growing seasons can help stabilize yields securing food supply under changing climatic conditions. Improving the forest cover in degraded areas can help to improve biodiversity and ecosystem health which in return shall act as natural barriers to landslides.

Any specific Climate Change initiative in the District by

- Govt. of India is implementing many climate change action initiatives not only in the district but also in the whole country. Under NICRA climate-resilient crop varieties improved water management practices and soil conservation techniques to help farmers adapt to changing weather patterns and extreme events is being promoted. PMKSY is being implemented in the district which supports the construction of irrigation infrastructure rainwater harvesting systems and efficient irrigation practices (like drip and sprinkler irrigation) to ensure sustainable water supply for farming particularly crucial in drought-prone areas. The programmes like Integrated Watershed Management Programme (IWMP) JalJeevan Mission (JJM) Bharatmala Pariyojana and National Highways Development Projects etc. are being implemented in the District. These initiatives reflect the Government of India's commitment to addressing climate change impacts in District Rajouri.
- The State Action Plan on Climate Change (SAPCC) for Jammu and Kashmir (J&K) is a strategic framework developed to address the challenges posed by climate change in the region. It aligns with India's National Action Plan on Climate Change (NAPCC) and aims to enhance the resilience of the states ecosystems and communities. The SAPCC is majorly focusing on Promoting Sustainable Agriculture Water Resource Management Forest and Biodiversity Conservation Energy Efficiency and Renewable Energy and generating climate awareness among the people.

• NABARD is actively involved in implementing various projects aimed at watershed management and tribal development in District Rajouri UT of Jammu and Kashmir. These initiatives focus on sustainable development and improving the livelihoods of local communities. One WDF project is being implemented in the Kalakote block of the District and another TDF project is being implemented in the Planger block of the district. Both the projects are aimed at conserving natural resources in District Rajouri through implementation of water/soil conservation measures livelihood generation activities capacity building exposure visits and generating awareness among the people with respect to the climate change.

Appendix 2

Potential for Geographical Indication (GI) in the district

- Geographical Indication (GI) is an Intellectual Property Right (IPR) that identifies
 goods originating from a specific geographical location and having distinct nature
 quality and characteristics linked to that location. GIs can play an important role in
 rural development empowering communities acting as product differentiators
 support brand building create local employment reduce rural migration creating a
 regional brand generating spin-off effects in tourism and gastronomy preserving
 traditional knowledge and traditional cultural expressions and conserving
 biodiversity.
- NABARD's intervention in Geographical Indications envisages end-to-end support in facilitating pre-registration as well as post-registration activities for Geographical Indications in order to appreciate quality improve market access create awareness strengthen producer's capacity to enforce their rights subsidize cost of registration enforcement and marketing.
- The Rajouri Chikri Wood Craft from UT of Jammu and Kashmir received the Geographical Indication (GI) tag highlighting its unique heritage and significance. Known for its intricate carvings and craftsmanship this wood craft uses a special variety of wood called Chikri found only in the Rajouri district. The wood is soft and lends itself well to delicate detailed designs often featuring floral and geometrical patterns. The GI tagging process for this craft was initiated in December 2020 by the National Bank for Agriculture and Rural Development (NABARD) in collaboration with the Department of Handicrafts & Handloom and the Department of Agriculture. GI recognition is expected to draw more attention to Rajouri's artisans improving economic stability and preserving traditional craftsmanship for future generations. It also reinforces the importance of Rajouri's cultural identity as this craft remains an intrinsic part of the regions artistic legacy.
- The Rajma (kidney beans) grown in the Budhal Block of Rajouri District UT of Jammu and Kashmir is well-regarded for its unique taste quality and adaptability to the region's climatic and soil conditions. Cultivated at high altitudes this local variety of Rajma has become a symbol of the region's agricultural heritage and a popular choice among locals and tourists alike. The Rajma cultivated in the Budhal Block is a promising candidate for Geographical Indication (GI) recognition. Budhal Rajma is cultivated using time-honored methods that make the best of the high-altitude climate and mineral-rich soils of Rajouri. Clean mountain water organic soil and the absence of chemical fertilizers enhance its quality and contribute to its GI potential. Securing a GI tag for Budhal Rajma would protect it from imitation allowing farmers to command better prices and promote their product more effectively. A GI tag would also enhance the market appeal drawing interest from buyers looking for authentic high-quality products and contributing to the region's rural development.
- The Anardana (dried pomegranate seeds) from the Manjakote Block of Rajouri District in UT of Jammu and Kashmir is renowned for its tangy flavor medicinal properties and rich culinary applications. Sourced from local pomegranates grown in the region Manjakote Anardana represents the distinct agricultural produce of this area and holds potential for broader recognition. Also anardana from Manjakote block has the potential to gain Geographical Indication (GI) status which would help protect its authenticity and enhance its market value. A GI tag would not only promote

this local specialty but also support the livelihoods of farmers in Manjakote encouraging sustainable agriculture and greater economic stability. By gaining wider recognition Manjakote Anardana could become a symbol of Rajouri's rich agricultural heritage promoting both the region's traditional flavors and its economic development.

NABFOUNDATION

Leveraging the power of convergence

NABFOUNDATION is a wholly owned, not for profit, subsidiary of NABARD, established under Sec 8 of Companies Act, 2013. The organization draws its strength and experience from the thousands of development projects grounded by its parent body, NABARD, in multiple domains over nearly last four decades.

WHAT DOES NABFOUNDATION WANT FROM YOU? IF YOU ARE AN INDIVIDUAL

Reach out to us with your ideas about development projects which you believe need to be implemented. We really look forward to your fresh ideas.

IF YOU ARE A CSR UNIT

Of a corporate and believe that there is a scope for collaborating with us to have access to the vast network of resources of NABARD in a structured manner, just give us a call.

IF YOU ARE A CIVIL SOCIETY ORGANIZATION/NGO

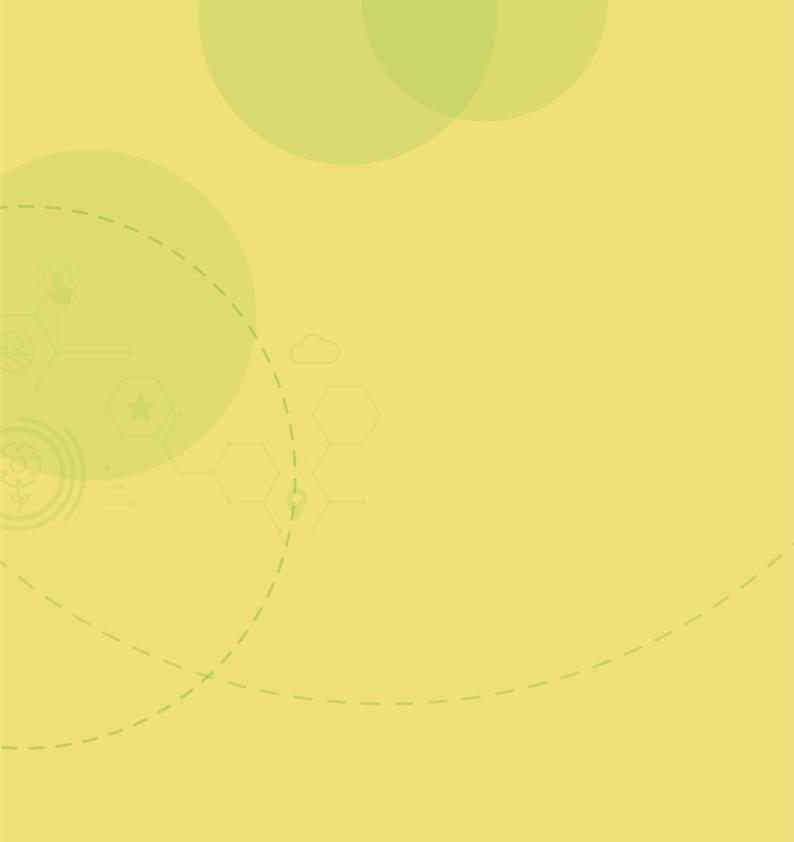

With an idea whose time you think has come and have not been able to find willing partners, reach out to us.

IF YOU ARE WITH THE GOVERNMENT

And believe that there is a need for reimagining implementation of your Central or State government projects, allow us to be a part of your vision.
